Gripper series 5000

THE KNOW-HOW FACTORY

THE KNOW-HOW FACTORY

ZIMMER GROUP

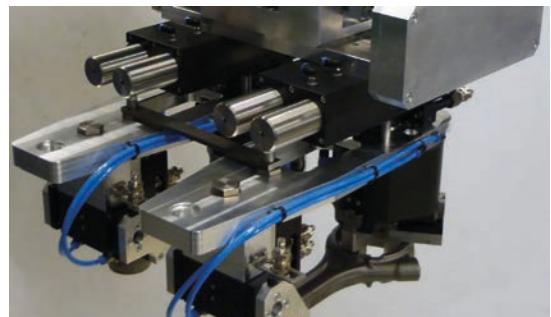

COMMITTED TO OUR CUSTOMERS

WE HAVE SUCCEEDED FOR YEARS BY OFFERING OUR CUSTOMERS INNOVATIVE AND INDIVIDUALIZED SOLUTIONS. ZIMMER HAS GROWN CONTINUOUSLY AND TODAY WE HAVE REACHED A NEW MILESTONE: THE ESTABLISHMENT OF THE KNOW-HOW FACTORY. IS THERE A SECRET TO OUR SUCCESS?

Foundation. Excellent products and services have always been the foundation of our company's growth. Zimmer is a source of ingenious solutions and important technical innovations. This is why customers with high expectations for technology frequently find their way to us. When things get tricky, Zimmer Group is in its best form.

Style. We have an interdisciplinary approach to everything we do, resulting in refined process solutions in six technology fields. This applies not just to development but to production. Zimmer Group serves all industries and stands ready to resolve even the most unique and highly individualized problems. Worldwide.

Motivation. Customer orientation is perhaps the most important factor of our success. We are a service provider in the complete sense of the word. With Zimmer Group, our customers have a single, centralized contact for all of their needs. We approach each customer's situation with a high level of competence and a broad range of possible solutions.

TECHNOLOGIES

HANDLING TECHNOLOGY

MORE THAN 30 YEARS OF EXPERIENCE AND INDUSTRY KNOWLEDGE: OUR PNEUMATIC, HYDRAULIC AND ELECTRICAL HANDLING COMPONENTS AND SYSTEMS ARE GLOBAL LEADERS.

Components. More than 2,000 standardized grippers, swivel units, robotic accessories and much more. We offer a complete selection of technologically superior products that are ready for rapid delivery.

Semi-standard. Our modular approach to design enables custom configurations and high rates of innovation for process automation.

DAMPING TECHNOLOGY

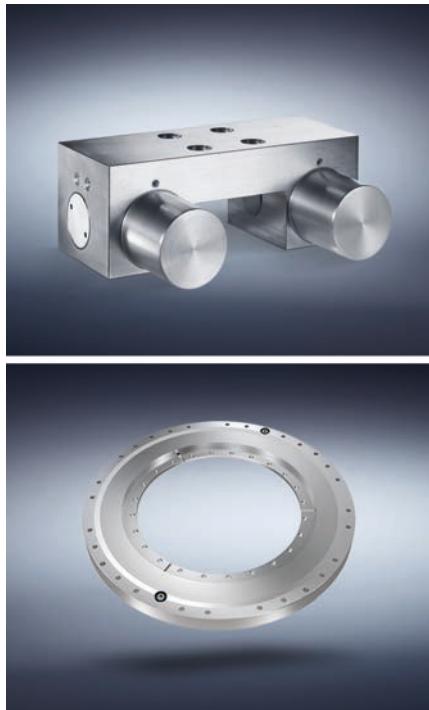

INDUSTRIAL DAMPING TECHNOLOGY AND SOFT CLOSE PRODUCTS EXEMPLIFY THE INNOVATION AND PIONEERING SPIRIT OF THE KNOW-HOW FACTORY.

Industrial damping technology.

Whether standard or customized solutions, our products stand for the highest cycle rates and maximum energy absorption with minimal space requirements.

Soft Close. Development and mass production of pneumatic and fluid dampers with extraordinary quality and rapid delivery.

OEM and direct. Whether they need components, returning mechanisms or complete production lines – we are the trusted partner of many prestigious customers.

LINEAR TECHNOLOGY

WE DEVELOP LINEAR COMPONENTS AND SYSTEMS THAT ARE INDIVIDUALLY ADAPTED TO OUR CUSTOMERS' NEEDS.

Clamping and braking elements. We offer you more than 4,000 types for profiled and round rails as well as for a variety of guide systems from all manufacturers. It makes no difference whether you prefer manual, pneumatic, electric or hydraulic drive.

Flexibility. Our clamping and braking elements ensure that movable components such as Z-axes or machining tables maintain a fixed position and that machines and systems come to a stop as quickly as possible in an emergency.

PROCESS TECHNOLOGY

MAXIMUM EFFICIENCY IS ESSENTIAL FOR SYSTEMS AND COMPONENTS USED IN PROCESS TECHNOLOGY. HIGH-LEVEL CUSTOM SOLUTIONS ARE OUR TRADEMARK.

A rich reservoir of experience. Our know-how ranges from the development of materials, processes and tools through product design to production of series products.

Deep production capabilities. The Zimmer Group pairs these capabilities with flexibility, quality and precision, even when making custom products.

Series production. We manufacture demanding products out of metal (MIM), elastomers and plastics with flexibility and speed.

MACHINE TECHNOLOGY

ZIMMER GROUP DEVELOPS INNOVATIVE METAL, WOOD AND COMPOSITE MATERIAL PROCESSING TOOL SYSTEMS FOR ALL INDUSTRIES. NUMEROUS CUSTOMERS CHOOSE US AS THEIR SYSTEMS AND INNOVATION PARTNER.

Knowledge and experience. Industry knowledge and a decades-long development partnership in exchangeable assemblies, tool interfaces and systems make us bound for new challenges around the world.

Components. We deliver numerous standard components from stock and develop innovative, customized systems for OEM and end customers – far beyond the metal and wood processing industries.

Variety. Whether you have machining centers, lathes or flexible production cells, the power tools, holders, assemblies and drilling heads of Zimmer Group are ready for action.

SYSTEM TECHNOLOGY

ZIMMER GROUP IS ONE OF THE LEADING SPECIALISTS IN THE DEVELOPMENT OF CUSTOMIZED SYSTEM SOLUTIONS WORLDWIDE.

Customized. A team made up of more than 20 experienced designers and project engineers develop and produce customized solutions for special tasks in close collaboration with end customers and system integrators. It doesn't matter if it is a simple gripper and handling solution or a complex system solution.

Solutions. These system solutions are used in many industries, from mechanical engineering to the automotive and supplier industries to plastics engineering and consumer goods industries, all the way to foundries. The Know-how Factory helps countless companies to thrive competitively by increasing automation efficiency.

BETTER THAN THE REST

GUARANTEED - WITHOUT ANY FUSS

► THE VALUE PROMISE – CONSISTENT AND WITHOUT FINE PRINT

Other manufacturers offer a 36-month warranty, but exclude wear parts and parts that make contact with the workpiece. Zimmer Group, on the other hand, offers uncompromising "Made in Germany" quality for all of its GPP and GPD5000 grippers backed up by a 24-month warranty. This applies to ALL PARTS without fine print, regardless of the number of cycles! Our products equip your system to make money, 24/7.

► 24/7 – NON-STOP

THE ALTERNATIVE ALUMINUM LINEAR GUIDE

They are the best alternative as they technically outperform all T-slot grippers and are at least on par with multi-tooth guided grippers. As "everyday grippers", they are enough for handling most applications yet offer 15 million cycles of maintenance-free performance.

THE BEST STEEL LINEAR GUIDE

The gripper's Steel Linear Guide combines the proven linear guide method with the very latest sealing and coating technology. As a result, you benefit from the most robust grippers currently available on the market in combination with corrosion protection and protection class IP64. Producing up to 30 million cycles without maintenance is no problem for this gripper.

► BENEFITS IN DETAIL

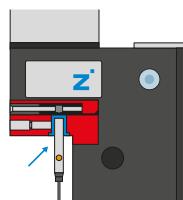

Transverse sensor grooves

The transverse sensor grooves mean you can change the piston position sensing quickly and easily, wherever the gripper is installed.

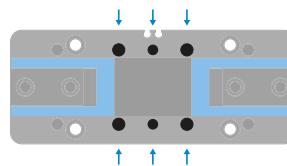

Limit stops for inductive sensors

Limit stops for inductive sensors ensure fast and reliable replacement. Sensing is adjusted using only a screw that does not require additional clamping.

Additional drilled holes

With additional pin holes underneath the cover plate for customer-specific attachments.

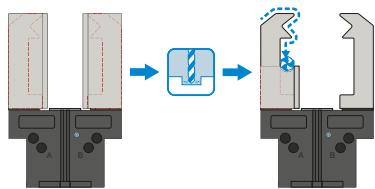

► RECOMMENDED ACCESSORIES

Universal jaws – UB5000

Can be used immediately or for individual reprocessing

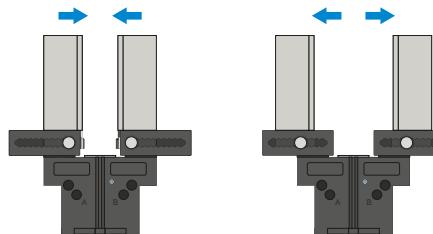

The gripper blanks are available in aluminum (AL) and steel (ST) versions and are installed directly on the gripper using the screws in the scope of delivery. The fits for the centering sleeves are already in place for this purpose. One universal jaw is required for each gripper jaw.

Adjustment jaws – EB5000

For tool-free adaptation of the gripper range

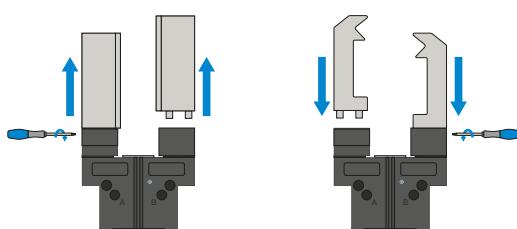

By manually activating the locking mechanism, which is pre-tensioned by a spring, the adjustment jaw can be moved within a grid of detent notches that has a number scale. Depending on the forces and torques that apply, the adjustment jaws are available in aluminum (AL) and steel (ST) versions. One adjustment jaw is required for each gripper jaw.

Interchangeable jaws – WB5000

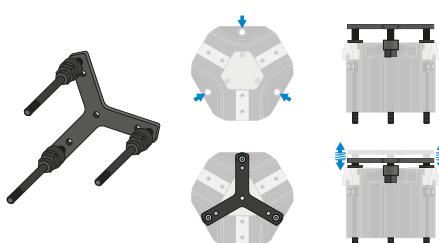

Enable fast change of individual gripper fingers

For each gripper jaw, a fixed part and at least one loose part set is needed, depending on the number of gripper fingers to be changed. Manual locking via the Torx wrench included in the scope of delivery of the fixed part can take place from two sides.

Pressure piece – ADS5000

When the gripper fingers are open, the pressure piece is used for spring-supported positioning of the workpiece against a limit stop. This greatly reduces the loads on the gripper that arise during joining.

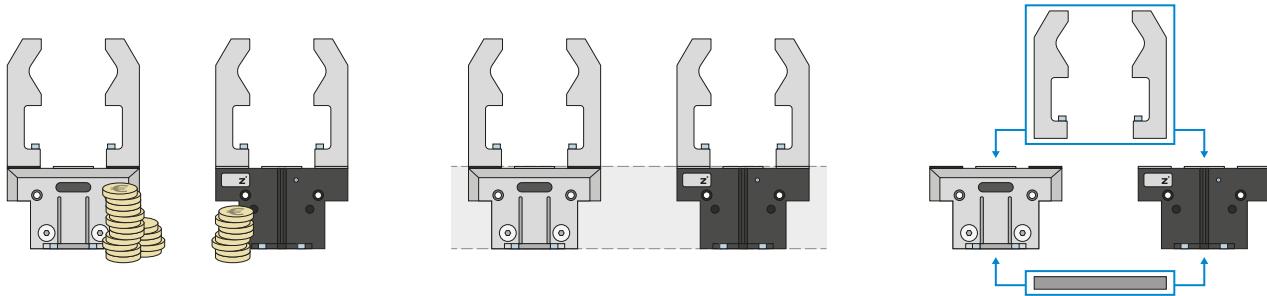

BETTER THAN THE REST

GUARANTEED - WITHOUT ANY FUSS

► THE MARKET CHECK

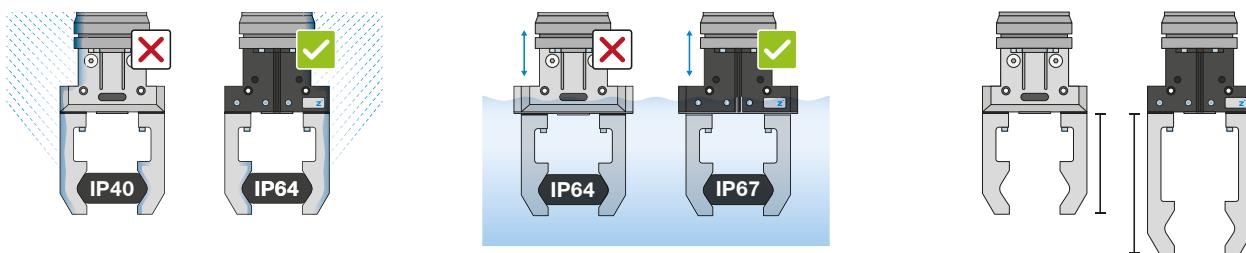

The ALternative – AL grippers packed with benefits

They are much more cost-effective than comparable grippers on the market and their standardized mounting options and dimensions make them easy to integrate into existing designs.

The premium grippers – Designed for universal use

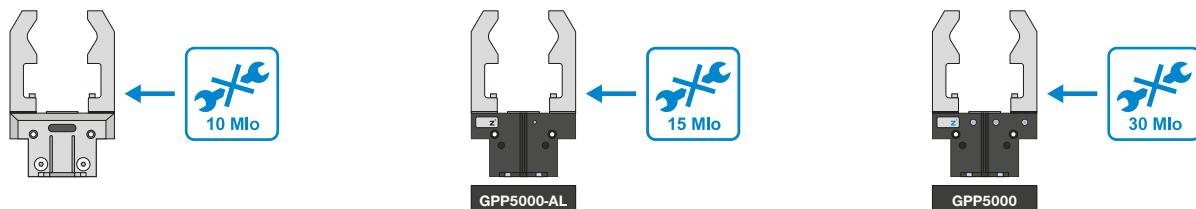

They are protected against corrosion and feature IP64 protection for ideal resistance to even the toughest environmental conditions. If this is not sufficient, the series offers temperature-resistant variants and protector variants with a protection class as high as IP67.

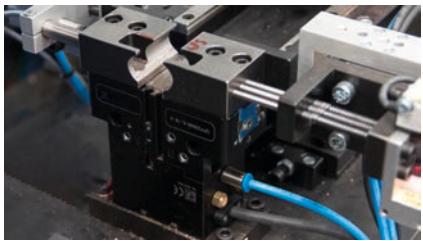

Maintenance free

With maintenance-free performance of up to 15 million gripping cycles, the AL grippers with their Aluminum Linear Guide offer a maintenance interval up to 50 percent higher than commonly available grippers.

The Steel Linear Guide premium grippers exceed these values, providing a maintenance interval up to 30 million cycles, and thus stand for long-term use and maximum system availability.

► CUSTOMER QUOTES

GRINDING AND POLISHING OF METAL PARTS

Mr. Hakkı Dogan, CEO Nurhak Metallbearbeitung/Velbert

„We have tried a few competitor products in the past. The GP5000 from Zimmer is clearly better! Other grippers wore out quickly and the gripping force diminished. Then they were no longer process-safe. The steel-on-steel guide is very low-wear and the plastic seal does not allow dirt to penetrate.“

PRODUCTION OF CYLINDER LOCKS

Mr. Hans-Stefan Csulits, CEO Heitec Auerbach GmbH & Co KG

„The durability of the grippers in adverse environments such as milling, drilling or broaching, both wet and dry, in our machines allows us to achieve the required process reliability. The freedom from maintenance of up to 30 million cycles saves our customers enormous maintenance and servicing costs, thereby guaranteeing higher machine output with lower production costs.“

LOADING AND UNLOADING HANDLING OF PROCESSING MACHINES

Mr. Karsten Krug, Mitec Automotive AG

„On existing loading and unloading handling systems of our machining centres, we have replaced existing grippers with grippers from the Zimmer Group's 5000 product family. Since then, the applications have been running smoothly and absolutely reliably.“

► PRODUCT ADVANTAGES

“The best”

► Steel Linear Guide –

The superior guidance system concept

The steel / steel guide stands for lasting precision, durability and a long service life—featuring maintenance intervals of up to 30 million gripping cycles. Benefit from these features and increase the profitability and process reliability of your machine.

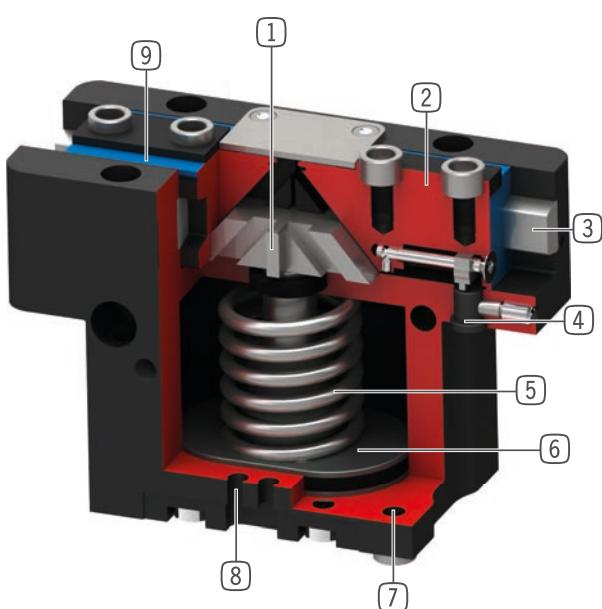

► Leakproof and corrosion protected – The universal gripper

Suitable for virtually all ambient conditions, with a sealed guide up to IP67 and corrosion protection as standard, you are able to use this gripper universally. As a result, the range of models in your production is reduced, along with a reduction in associated storage and process costs.

► Aluminum Linear Guide – The alternative

Reduced to those aspects which are the most important, the steel / aluminum guide variant offers significantly better performance when compared to a similar gripper with a T-groove travel guide, and is on par with the best principles of toothed guidance systems.

► BENEFITS IN DETAIL

① Wedge hook mechanism

- Supports to absorb high forces and moments
- Synchronized gripper jaw movement

② Gripper jaw

- Gripper fingers mounted using removable centering sleeves
- Lubricated for life via incorporated lubrication slots

③ Steel Linear Guide

- Steel in steel guide
- Enables use of extremely long gripper fingers
- Also available in steel / aluminum variant

④ Mounting block

- mounting for inductive proximity switch

⑤ Integrated gripping force safety device

- Spring built into cylinder chamber as an energy store

⑥ Drive

- Double-acting pneumatic rotor cylinder

⑦ Mounting and positioning

- Alternatively, on several sides for customized mounting
- Pneumatic and electrical versions identical apart from height

⑧ Sensing slot

- mounting and positioning of magnetic field sensors

⑨ Dual lip seal

- IP64 and up to IP67 (with purged air) for Protector version
- Prevents grease from being squeezed out, increasing service life

2-JAW PARALLEL GRIPPERS

SERIES GPP5000 GRIPPER FINGER LENGTH

1

MAXIMUM GRIPPER FINGER LENGTH

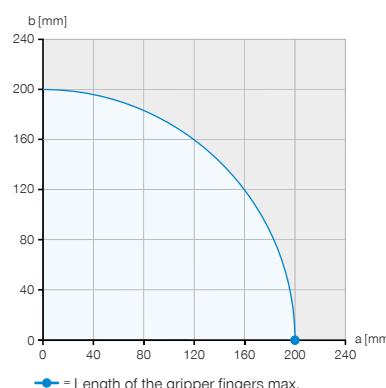

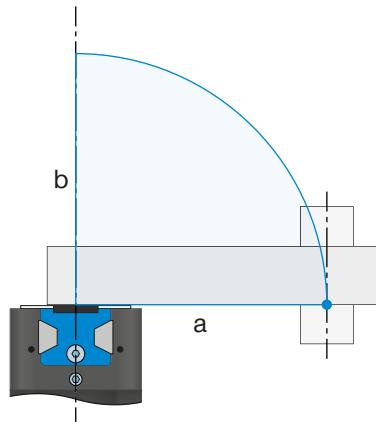

Example 1

Vertical force application point

$a = 0 \text{ mm}$

$b = 200 \text{ mm}$

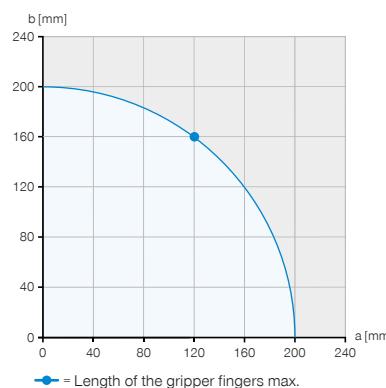

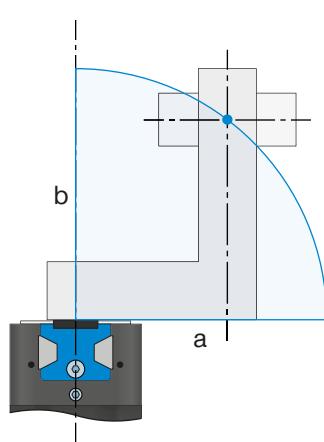

Example 2

Horizontal force application point

$a = 200 \text{ mm}$

$b = 0 \text{ mm}$

Example 3

Maximum permissible projection

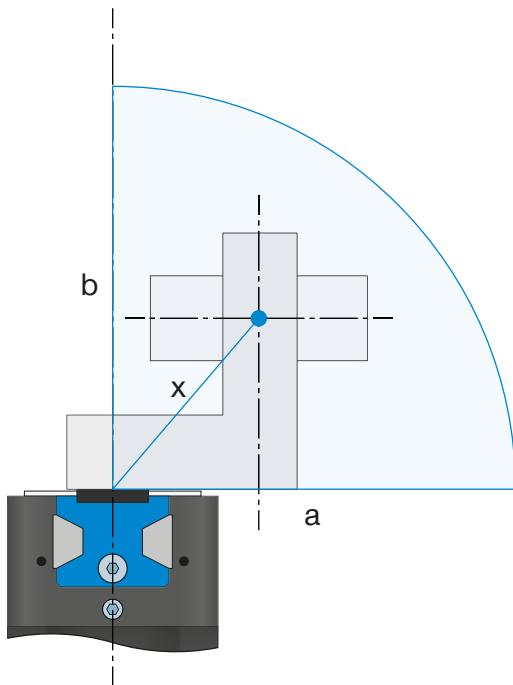

$a = 120 \text{ mm}$

$b = 160 \text{ mm}$

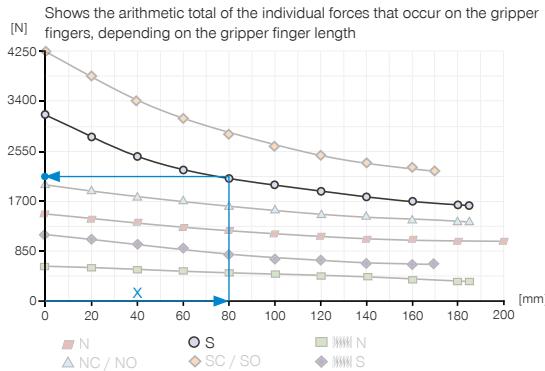

The examples show the maximum horizontal (a) and vertical (b) gripper finger length using the example of a GPP5013N-00-A, which is represented by the blue area.

GRIPPING FORCE AS A FUNCTION OF GRIPPER FINGER LENGTH

Gripping force diagram

Example 4

Resulting gripper finger length for determining the gripping force

$$a = 55 \text{ mm}$$

$$b = 58 \text{ mm}$$

$$x = \sqrt{55^2 + 58^2} = 80 \Rightarrow 2125 \text{ N}$$

GUIDE CHARACTERISTICS

Steel / aluminum guide and steel / steel guide in comparison

In general, the maximum possible length of gripper fingers of a steel / aluminum guide is lower in comparison to the steel / steel guide, due to the lower yield point of aluminum. While the maximum gripper finger length in the horizontal (a) and vertical (b) direction can be fully utilized for the steel / steel guide, the maximum gripper finger length that is specified in the technical data for the steel / aluminum guide is reduced by 20% at a horizontal (a) projection. The lower efficiency of a steel / aluminum guide also leads to a higher decrease in gripping force at an increased gripping finger length and to a reduction in service life as a result of a lower resistance to wear.

Steel / aluminum guide

Steel / aluminum guides are very common worldwide. They are available in many different forms and are installed in virtually all commercially available grippers from an extremely wide variety of manufacturers. The steel / aluminum grippers from Zimmer Group are available as AL variants of the tried-and-tested 5000 Series. Their designs are geared toward the important aspects and they are very cost-effective.

Steel / steel guide

Steel / steel guides are the best and first choice wherever durability and robustness are essential. The Steel Linear Guide from Zimmer Group is also clearly distinguished from a steel / aluminum guide thanks to its exclusive design featuring higher material characteristics.

Steel Linear Guide – Added value in detail

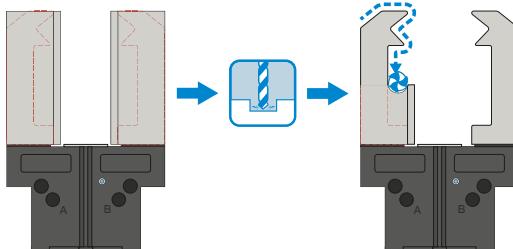

- + Steel in steel guide
- + IP64 and up to IP67 (with sealing air) in the protector version
- + Corrosion protected
- + Up to 30 million maintenance-free cycles (max.)

2-JAW PARALLEL GRIPPERS

SERIES GPP5000 FUNCTIONAL DESCRIPTION

1

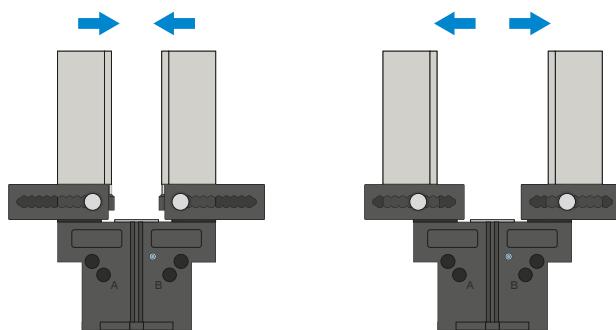

GRIPPING COMPONENTS

Universal jaws – UB5000

Can be used immediately or for individual reprocessing

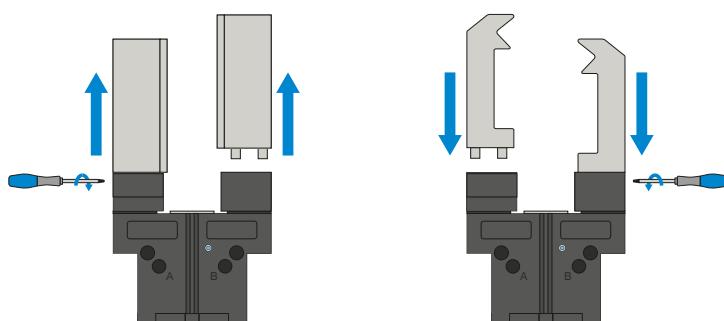

The gripper blanks are available in aluminum (AL) and steel (ST) versions and are installed directly on the gripper using the screws in the scope of delivery. The fits for the centering sleeves are already in place for this purpose. One universal jaw is required for each gripper jaw.

Adjustment jaws – EB5000

For tool-free adaptation of the gripper range

By manually activating the locking mechanism, which is pre-tensioned by a spring, the adjustment jaw can be moved within a grid of detent notches that has a number scale. Depending on the forces and torques that apply, the adjustment jaws are available in aluminum (AL) and steel (ST) versions. One adjustment jaw is required for each gripper jaw.

Interchangeable jaws – WB5000

Enable fast change of individual gripper fingers

For each gripper jaw, a fixed part and at least one loose part set is needed, depending on the number of gripper fingers to be changed. Manual locking via the Torx wrench included in the scope of delivery of the fixed part can take place from two sides.

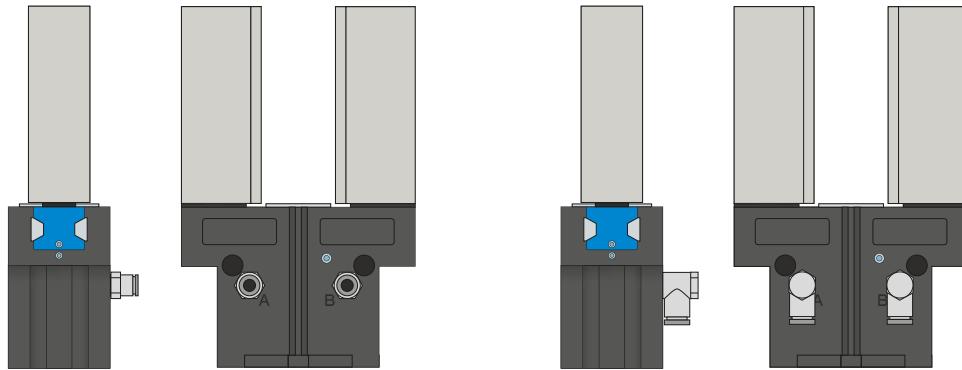

THE GRIPPING COMPONENTS CAN BE COMBINED!

The gripper components listed above can be combined with each other and are compatible with the various series of the 5000 gripper family.

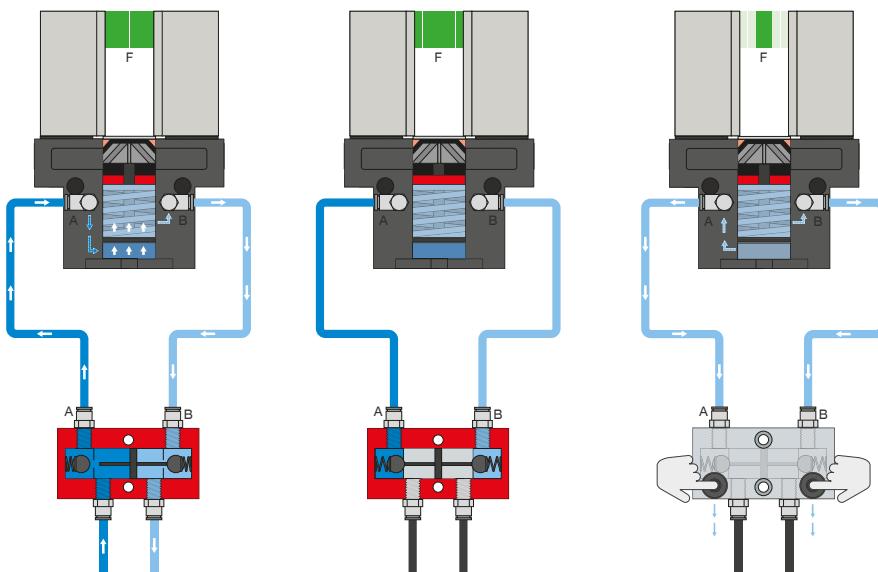

ENERGY SUPPLY

1

Pneumatic threaded connections

Available in straight and angled design. Can be chosen freely depending on the space conditions or installation situation.

Pressure safety valve – DSV

Ensures safe retention of force and position if the system pressure drops

The integrated double check valve, which can be unlocked, retains the system pressure of the gripper in case of EMERGENCY STOP. To ensure the function, the valve must be installed as close to the gripper's air connection as possible. In variant E, two pushbuttons are installed that allow for controlled bleeding of the gripper.

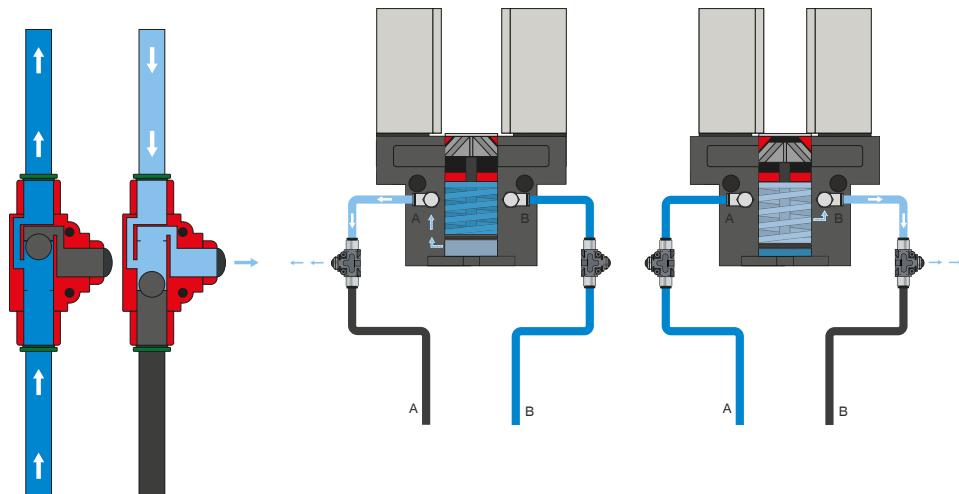

2-JAW PARALLEL GRIPPERS

SERIES GPP5000 FUNCTIONAL DESCRIPTION

1

ENERGY SUPPLY

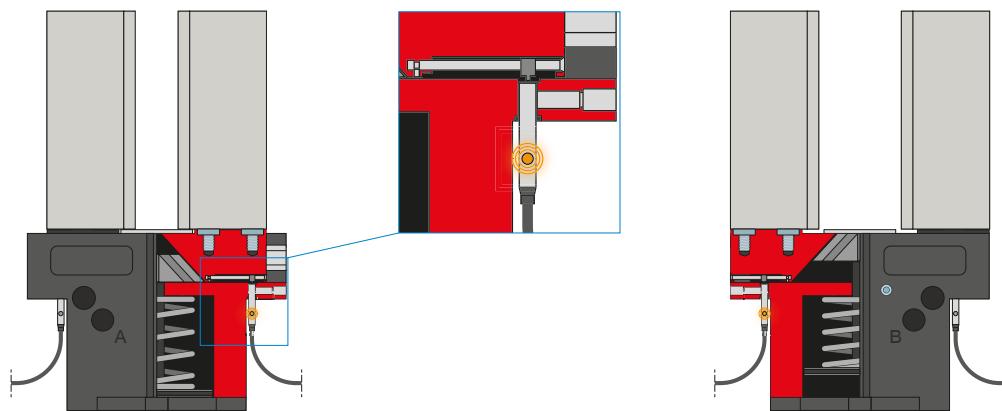

Quick exhaust valve – DEV

For rapid bleeding of the compressed air and preventing back pressure

The inline valves make a faster cycle time possible and prevent the formation of condensate in grippers with a small cylinder volume. To ensure the function, the valve must be installed as close to the gripper's air connection as possible.

SENSORS

Inductive sensors – NJ*

For direct position sensing of the gripper jaws

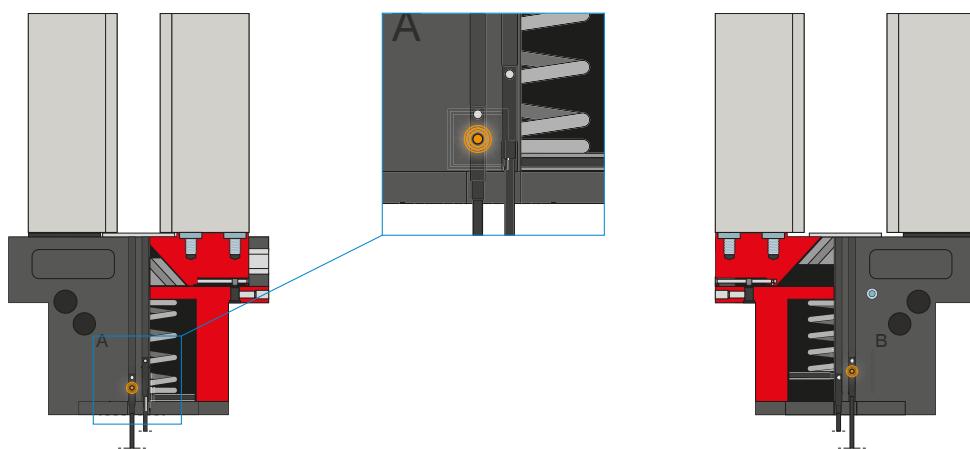

The sensor is guided into the intake as far as it will go and fixed in place using the lateral clamping screw. Tuning to the desired position then takes place by adjusting the cam switch. The sensors are available in versions with 5 m cables with exposed leads and 0,3 m cable with connector, as well as with direct plug orientation.

*Not for variant AL-A

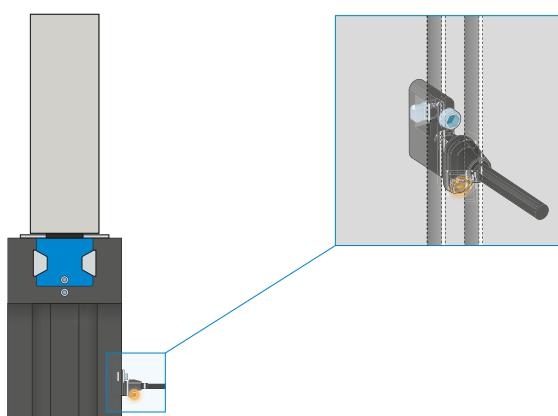

SENSORS

MFS02

MFS01

1-point magnetic field sensors – MFS

For non-contact sensing of the piston position

These sensors are installed in the C-groove of the gripper and detect the magnet attached to the piston of the gripper. To ensure use in a wide variety of space conditions, the sensors are available in two variants. While the horizontal MFS02, with straight cable outlet, disappears into the C-groove of the gripper almost completely, the vertical MFS01 is taller, but has a cable outlet that is offset at an angle of 90°. The variants are available in versions with 5 m cables with exposed leads and 0,3 m cable with connector.

2-JAW PARALLEL GRIPPERS

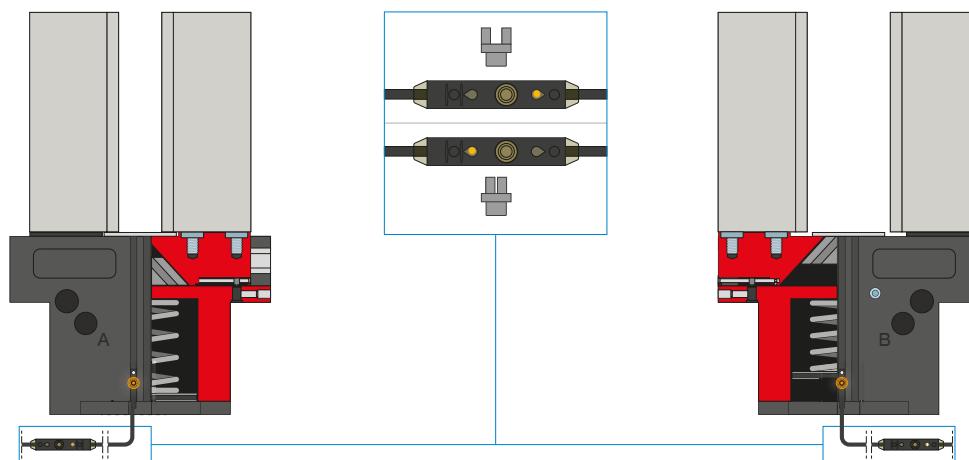

SERIES GPP5000 FUNCTIONAL DESCRIPTION

1

SENSORS

MFS02

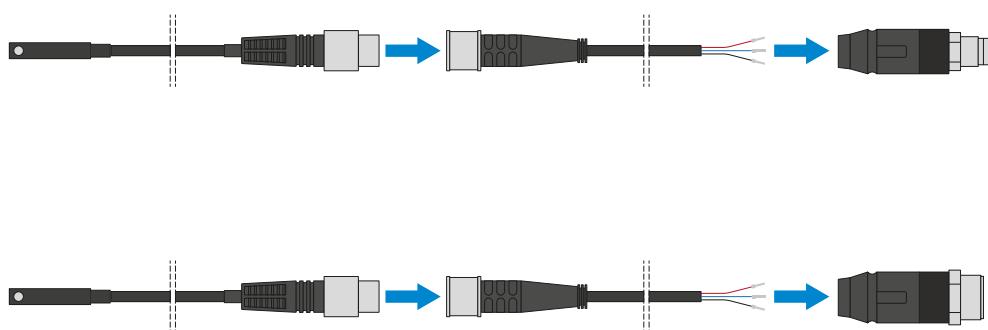

2-point magnetic field sensors – MFS

With two freely programmable switching points

Using the programming unit integrated in the cable, two switch points can be freely defined for this sensor. To do so, the sensor is clamped in the C-groove, the gripper approaches position one and the position is taught in using the teach button. Afterwards, the second position is approached with the gripper and programmed. To ensure use in a wide variety of space conditions, the sensors are available in two variants. While the horizontal MFS02, with straight cable outlet, disappears into the C-groove of the gripper almost completely, the vertical MFS01 is taller, but has a cable outlet that is offset at an angle of 90°. The sensors are available in versions with 5 m cables with exposed leads and 0,3 m cable with connector.

CONNECTIONS / OTHER

Plug-in connectors

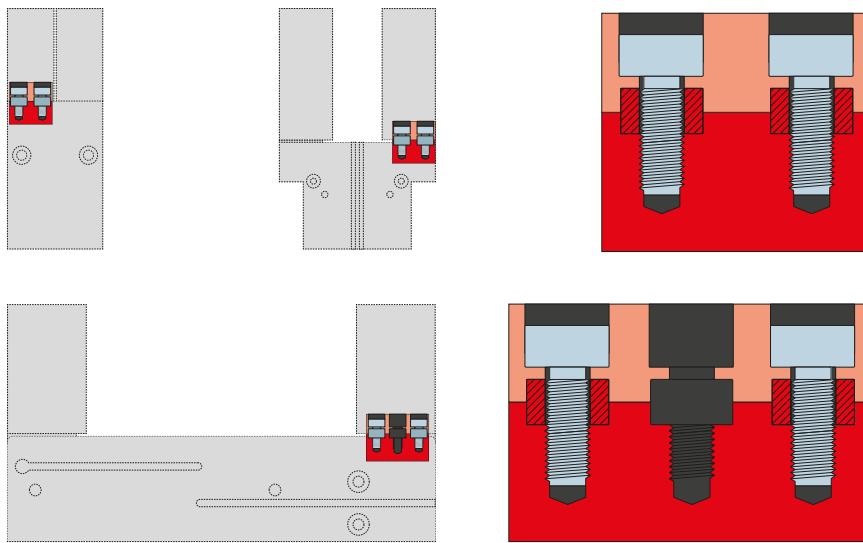

For extending and fabricating the connection lines for the sensors

Cables with a length of 5 m with exposed leads are available. Depending on the specific needs, the cables can be shortened or fabricated with connectors in sizes M8 and M12.

CONNECTIONS / OTHER

1

Centering sleeves

For defined position measurement of the gripper fingers

The centering sleeves are inserted into the fits of the gripper jaws to define the position of the gripper fingers. The centering sleeves are comparable to a pin connection.

Steel / steel guide

► **Gripping force diagram**

[N] Shows the arithmetic total of the individual forces that occur on the gripper fingers, depending on the gripper finger length

The graph plots the total gripping force in Newtons (N) against the gripper finger length in millimeters (mm). The Y-axis ranges from 0 to 16,000 N, and the X-axis ranges from 0 to 400 mm. Six data series are shown: N (red squares), NC / NO (blue triangles), S (white circles), SC / SO (orange diamonds), and two variants of S (black diamonds).

Finger Length [mm]	N [N]	NC / NO [N]	S [N]	SC / SO [N]	S [N]
0	15000	8000	12000	6000	4000
50	14000	7000	11000	5500	3500
100	12500	6500	9500	5000	3000
150	11000	6000	8500	4500	2500
200	10000	5500	7500	4000	2000
250	9500	5000	7000	3500	1800
300	9000	4500	6500	3000	1500
350	8500	4000	6000	2500	1200
400	8000	3500	5500	2000	1000

► **Forces and moments**

Displays static forces and moments that can also have an effect, besides the gripping force.

The diagram illustrates the static forces and moments acting on the gripper. It shows a side view of the gripper with arrows indicating force vectors: M_y (moment about the vertical axis), M_x (moment about the horizontal axis), M_r (reaction moment at the base), and F_a (reaction force at the base).

► PRODUCT ADVANTAGES

● IO-Link

“The hybrid”

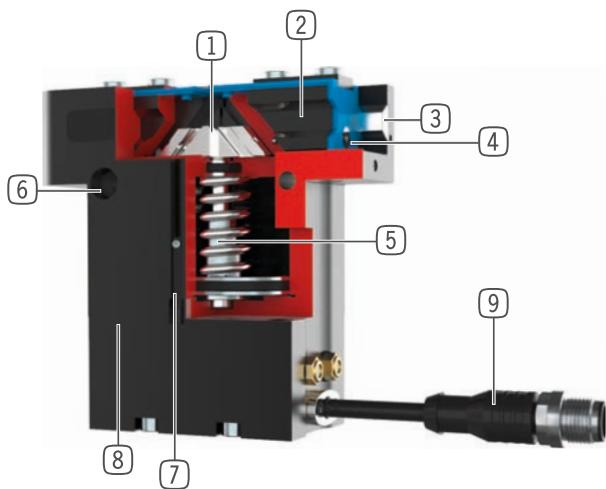

- ▶ Pneumatic drive combined with IO-Link technology
- ▶ Up to 50% reduction in cycle times and up to 90% less compressed air usage
- ▶ Connection over just one pneumatic line and IO-Link cable
- ▶ Integrated valve technology, sensor technology, status display, pressure monitoring and temperature monitoring
- ▶ Part detection down to +/- 0.05 mm for a tolerance range that can be taught for any value
- ▶ 32 workpieces data sets can be programmed
- ▶ Protected from corrosion and sealed in accordance with IP64
- ▶ Up to 30 million cycles without maintenance

► BENEFITS IN DETAIL

① Wedge hook mechanism

- Supports to absorb high forces and moments
- Synchronized gripper jaw movement

② Gripper jaw

- Gripper fingers mounted using removable centering sleeves
- Lubricated for life via incorporated lubrication slots

③ Steel Linear Guide

- Steel in steel guide
- Enables use of extremely long gripper fingers

④ Dual lip seal

- IP64
- Prevents grease from being squeezed out, increasing service life

⑤ Integrated gripping force safety device

- Spring built into cylinder chamber as an energy store

⑥ Mounting and positioning

- Alternatively, on several sides for customized mounting

⑦ Position sensing

- integrated Hallsensor

⑧ Integrated valve technology

- Activation of the gripper by means of a compressed air supply

⑨ Integrated control module

- Single-cable solution via IO-Link
- Pressure, temperature, position and other parameters are readable

2-JAW PARALLEL GRIPPERS

SERIES GPP5000IL FUNCTIONAL DESCRIPTION

GRIPPING COMPONENTS

2

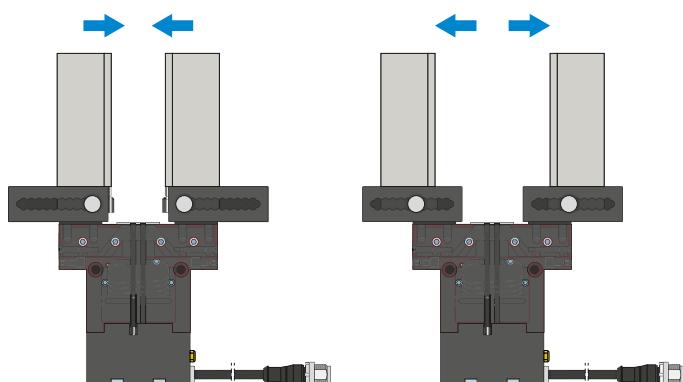

Series GPP5000IL / 2-Jaw Parallel Grippers / pneumatic / Grippers

Universal jaws – UB5000

Can be used immediately or for individual reprocessing

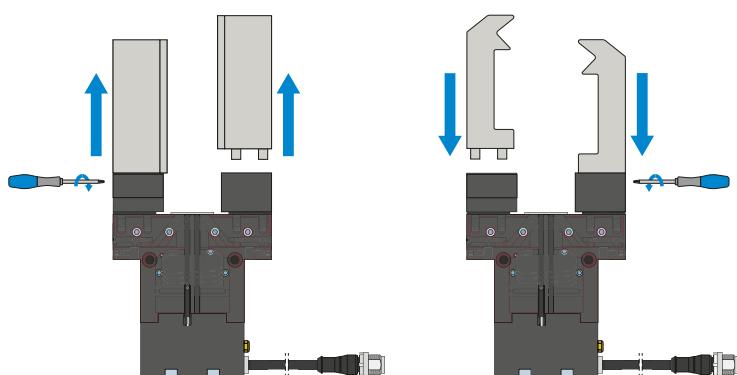

The gripper blanks are available in aluminum (AL) and steel (ST) versions and are installed directly on the gripper using the screws in the scope of delivery. The fits for the centering sleeves are already in place for this purpose. One universal jaw is required for each gripper jaw.

Adjustment jaws – EB5000

For tool-free adaptation of the gripper range

By manually activating the locking mechanism, which is pre-tensioned by a spring, the adjustment jaw can be moved within a grid of detent notches that has a number scale. Depending on the forces and torques that apply, the adjustment jaws are available in aluminum (AL) and steel (ST) versions. One adjustment jaw is required for each gripper jaw.

Interchangeable jaws – WB5000

Enable fast change of individual gripper fingers

For each gripper jaw, a fixed part and at least one loose part set is needed, depending on the number of gripper fingers to be changed. Manual locking via the Torx wrench included in the scope of delivery of the fixed part can take place from two sides.

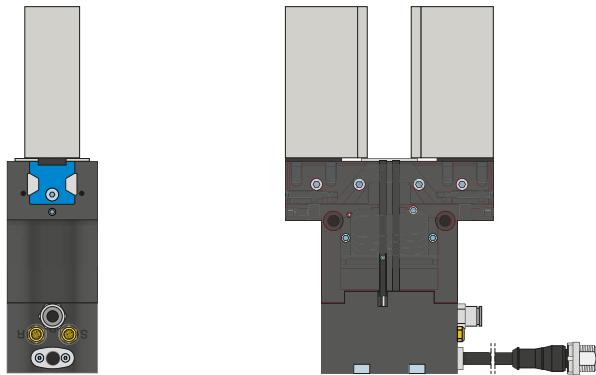

THE GRIPPING COMPONENTS CAN BE COMBINED!

The gripper components listed above can be combined with each other and are compatible with the various series of the 5000 gripper family.

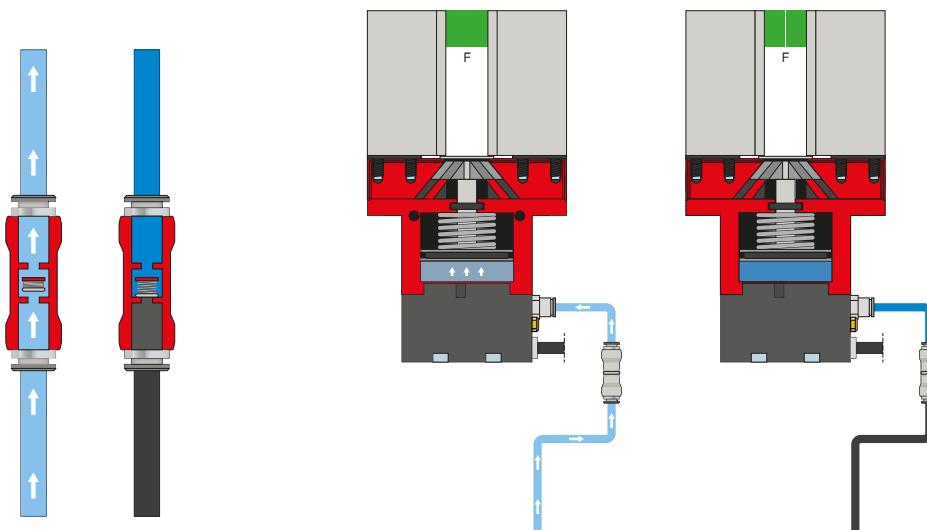

ENERGY SUPPLY

2

Pneumatic threaded connections

Available in straight and angled design. Can be chosen freely depending on the space conditions or installation situation.

Pressure safety valve – DSV

The throttle check valve integrated into the supply air line retains the system pressure in case of EMERGENCY STOP. To ensure the function, the valve must be installed as close to the gripper's air connection as possible. Control voltage and actuator voltage must be maintained for this purpose.

2-JAW PARALLEL GRIPPERS

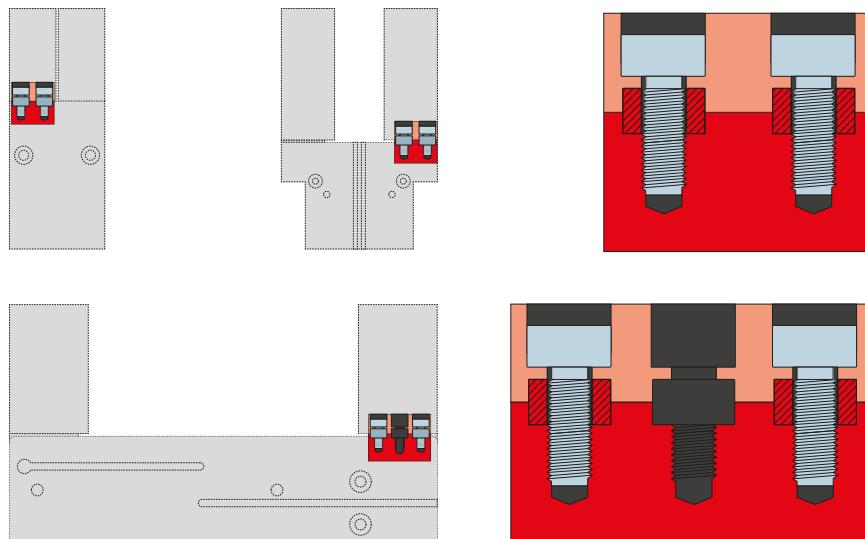

SERIES GPP5000IL FUNCTIONAL DESCRIPTION

CONNECTIONS / OTHER

2

Series GPP5000IL / 2-Jaw Parallel Grippers / pneumatic / Grippers

Centering sleeves

For defined position measurement of the gripper fingers

The centering sleeves are inserted into the fits of the gripper jaws to define the position of the gripper fingers. The centering sleeves are comparable to a pin connection.

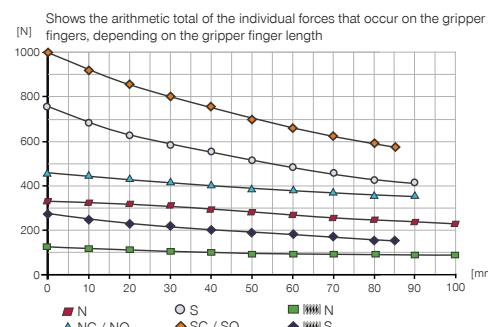

2-JAW PARALLEL GRIPPERS

SERIES GEP5000

► PRODUCT ADVANTAGES

IO-Link

"ALL in ONE"

- ▶ Approximately the same gripping force as a comparable pneumatic gripper
- ▶ Self locking mechanism in case of power drop
- ▶ Same connection hole patterns as a comparable pneumatic gripper
- ▶ Plug and play – single-cable solution, supports incredibly easy control using I/O signals or IO-Link
- ▶ Integrated ACM control module - option of configuring gripping force, travel time and switching points
- ▶ Protected from corrosion and sealed in accordance with IP64
- ▶ Brushless DC motor – up to 30 million cycles without maintenance

3

► SERIES CHARACTERISTICS

Installation size	Variants	
GEP50XX	IL-00	IO-00
IO-Link	●	
Digital I/O		●
30 million maintenance-free cycles (max.)	●	●
Integrated sensing	●	●
Gripping force adjustable	●	●
Self locking mechanism	●	●
Protected against corrosion	●	●
Purged air	●	●
IP 64	●	●

► BENEFITS IN DETAIL

① Wedge hook mechanism

- Supports to absorb high forces and moments
- Synchronized gripper jaw movement

② Gripper jaw

- Gripper fingers mounted using removable centering sleeves
- Lubricated for life via incorporated lubrication slots

③ Dual lip seal

- Enables IP64
- Prevents grease from being squeezed out, increasing service life

④ Steel Linear Guide

- Steel in steel guide
- Enables use of extremely long gripper fingers

⑤ Mounting and positioning

- Alternatively, on several sides for customized mounting
- Pneumatic and electrical versions identical apart from height

⑥ BLDC motor

- wear-resistant brushless DC motor

⑦ Advanced control module

- Integrated control module with single-cable solution
- Gripping force, travel time and query programmable via the control panel on the housing

⑧ Drive train

- Combination of trapezoidal spindle and gear
- Durable and robust

2-JAW PARALLEL GRIPPERS

SERIES GEP5000 FUNCTIONAL DESCRIPTION

GRIPPING COMPONENTS

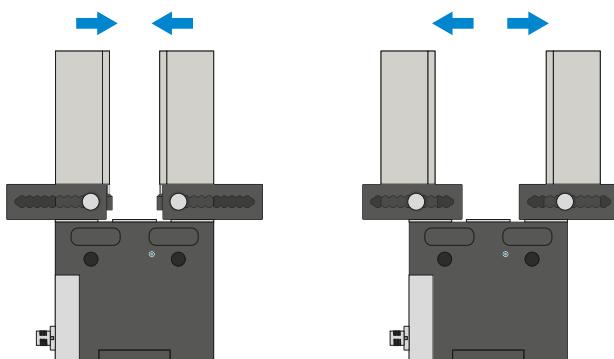

3

Universal jaws – UB5000

Can be used immediately or for individual reprocessing

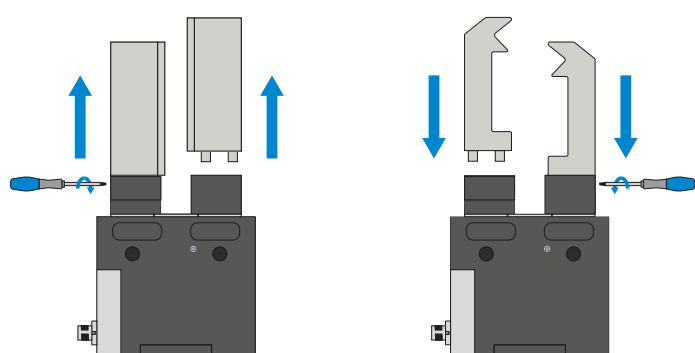

The gripper blanks are available in aluminum (AL) and steel (ST) versions and are installed directly on the gripper using the screws in the scope of delivery. The fits for the centering sleeves are already in place for this purpose. One universal jaw is required for each gripper jaw.

Adjustment jaws – EB5000

For tool-free adaptation of the gripper range

By manually activating the locking mechanism, which is pre-tensioned by a spring, the adjustment jaw can be moved within a grid of detent notches that has a number scale. Depending on the forces and torques that apply, the adjustment jaws are available in aluminum (AL) and steel (ST) versions. One adjustment jaw is required for each gripper jaw.

Interchangeable jaws – WB5000

Enable fast change of individual gripper fingers

For each gripper jaw, a fixed part and at least one loose part set is needed, depending on the number of gripper fingers to be changed. Manual locking via the Torx wrench included in the scope of delivery of the fixed part can take place from two sides.

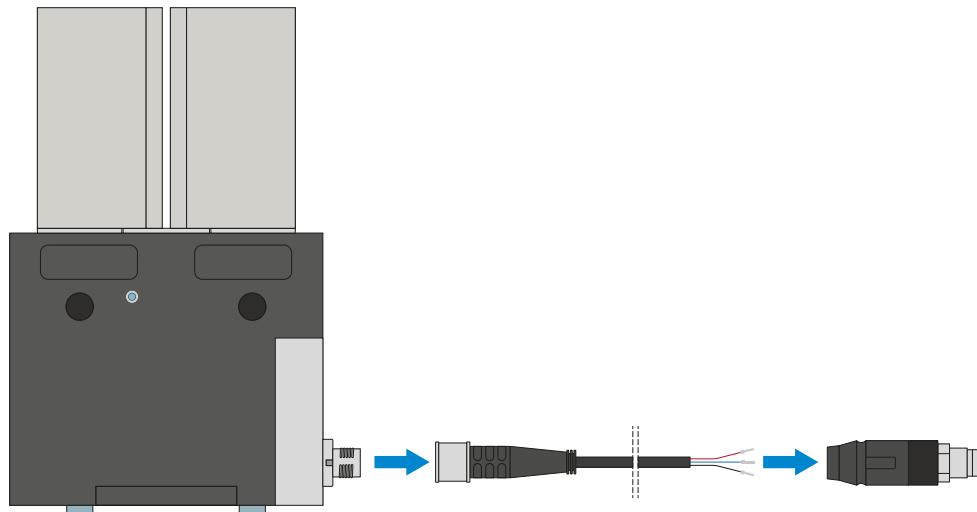

THE GRIPPING COMPONENTS CAN BE COMBINED!

The gripper components listed above can be combined with each other and are compatible with the various series of the 5000 gripper family.

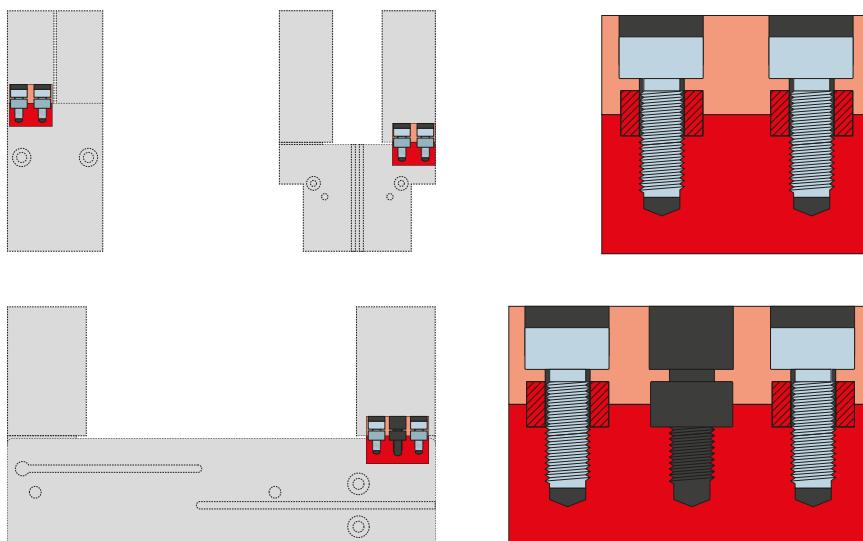

CONNECTIONS / OTHER

Plug-in connectors

For extending and fabricating the connection lines

Cables with a length of 10 m with exposed leads are available. Depending on the specific needs, the cables can be shortened or fabricated with connectors in sizes M12. A 5 m long cable with connector / socket is available for the IO-Link connection.

Centering sleeves

For defined position measurement of the gripper fingers

The centering sleeves are inserted into the fits of the gripper jaws to define the position of the gripper fingers. The centering sleeves are comparable to a pin connection.

3-JAW CONCENTRIC GRIPPERS

SERIES GPD5000

► PRODUCT ADVANTAGES

“The best”

► Steel Linear Guide –

The superior guidance system concept

The steel / steel guide stands for lasting precision, durability and a long service life—featuring maintenance intervals of up to 30 million gripping cycles. Benefit from these features and increase the profitability and process reliability of your machine.

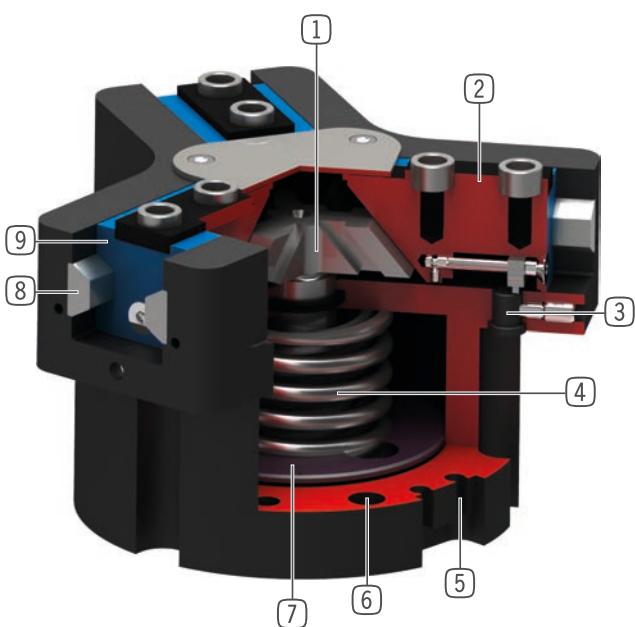

► Leakproof and corrosion protected – The universal gripper

Suitable for virtually all ambient conditions, with a sealed guide up to IP67 and corrosion protection as standard, you are able to use this gripper universally. As a result, the range of models in your production is reduced, along with a reduction in associated storage and process costs.

► Aluminum Linear Guide – The alternative

Reduced to those aspects which are the most important, the steel / aluminum guide variant offers significantly better performance when compared to a similar gripper with a T-groove travel guide, and is on par with the best principles of toothed guidance systems.

► BENEFITS IN DETAIL

① Wedge hook mechanism

- high forces and moments capacity
- Synchronized gripper jaw movement

② Gripper jaw

- Gripper fingers mounted using removable centering sleeves
- Lubricated for life via incorporated lubrication slots

③ Mounting block

- mounting for inductive proximity switch

④ Integrated gripping force safety device

- Spring built into cylinder chamber as an energy store

⑤ Sensing slot

- mounting and positioning of magnetic field sensors

⑥ Mounting and positioning

- Alternatively, on several sides for customized mounting
- Pneumatic and electrical versions identical apart from height

⑦ Drive

- Double-acting pneumatic rotor cylinder

⑧ Steel Linear Guide

- Steel in steel guide
- Enables use of extremely long gripper fingers
- Also available in steel / aluminum variant

⑨ Dual lip seal

- IP64 and up to IP67 (with purged air) for Protector version
- Prevents grease from being squeezed out, increasing service life

3-JAW CONCENTRIC GRIPPERS

SERIES GPD5000 FUNCTIONAL DESCRIPTION

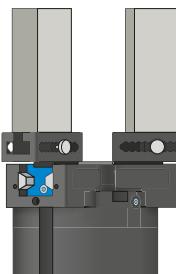

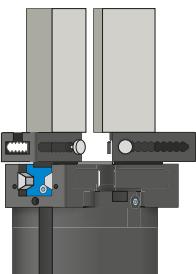

GRIPPING COMPONENTS

Universal jaws – UB5000

Can be used immediately or for individual reprocessing

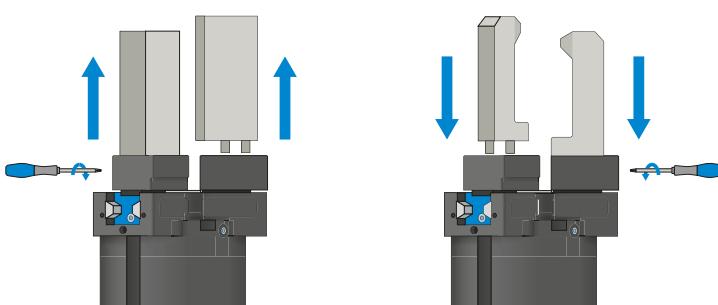

The gripper blanks are available in aluminum (AL) and steel (ST) versions and are installed directly on the gripper using the screws in the scope of delivery. The fits for the centering sleeves are already in place for this purpose. One universal jaw is required for each gripper jaw.

Adjustment jaws – EB5000

For tool-free adaptation of the gripper range

By manually activating the locking mechanism, which is pre-tensioned by a spring, the adjustment jaw can be moved within a grid of detent notches that has a number scale. Depending on the forces and torques that apply, the adjustment jaws are available in aluminum (AL) and steel (ST) versions. One adjustment jaw is required for each gripper jaw.

Interchangeable jaws – WB5000

Enable fast change of individual gripper fingers

For each gripper jaw, a fixed part and at least one loose part set is needed, depending on the number of gripper fingers to be changed. Manual locking via the Torx wrench included in the scope of delivery of the fixed part can take place from two sides.

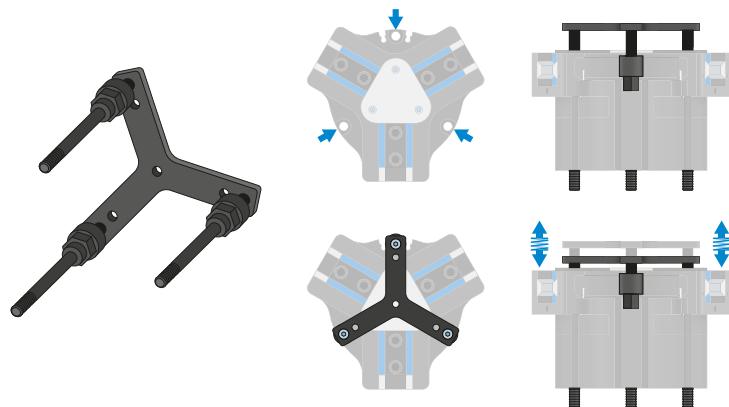

THE GRIPPING COMPONENTS CAN BE COMBINED!

The gripper components listed above can be combined with each other and are compatible with the various series of the 5000 gripper family.

GRIPPING COMPONENTS

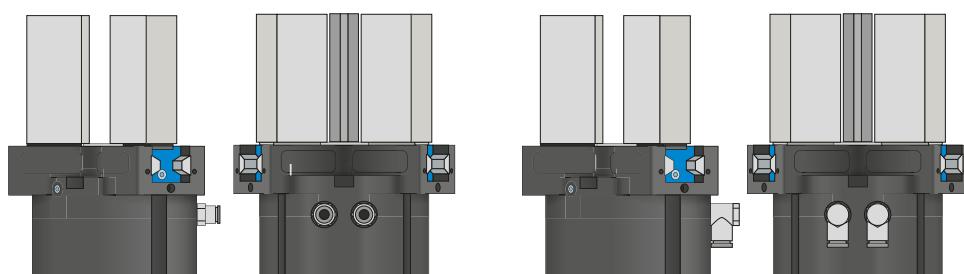

Pressure piece – ADS5000

When the gripper fingers are open, the pressure piece is used for spring-supported positioning of the workpiece against a limit stop. This greatly reduces the loads on the gripper that arise during joining.

4

ENERGY SUPPLY

Pneumatic threaded connections

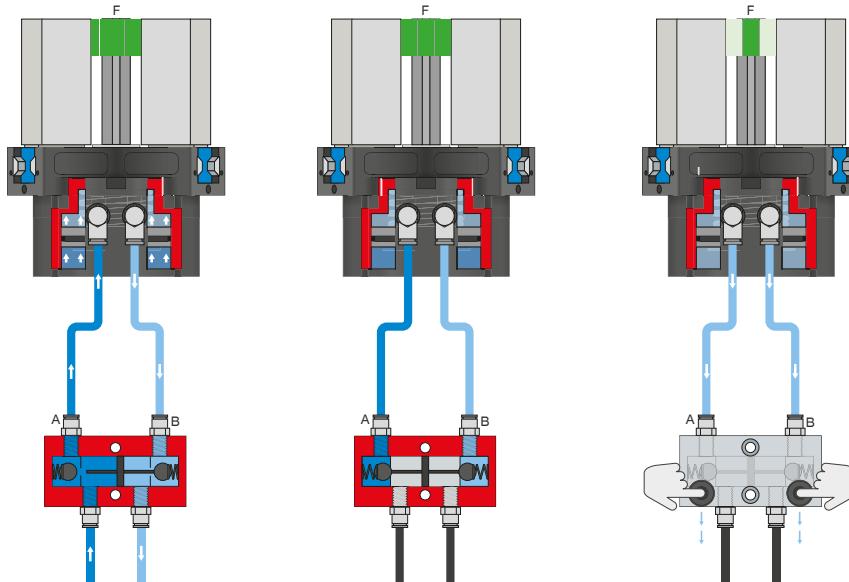

Available in straight and angled design. Can be chosen freely depending on the space conditions or installation situation.

3-JAW CONCENTRIC GRIPPERS

SERIES GPD5000 FUNCTIONAL DESCRIPTION

ENERGY SUPPLY

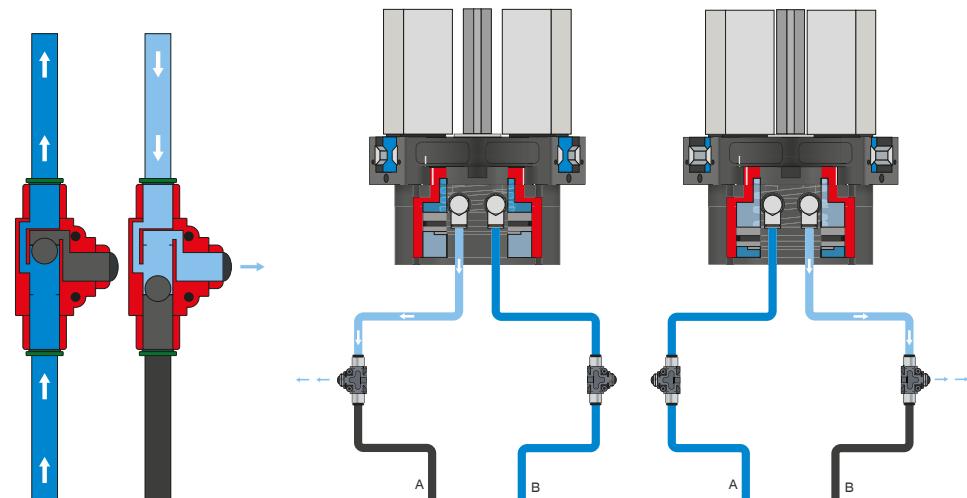

4

Pressure safety valve – DSV

Ensures safe retention of force and position if the system pressure drops

The integrated double check valve, which can be unlocked, retains the system pressure of the gripper in case of EMERGENCY STOP. To ensure the function, the valve must be installed as close to the gripper's air connection as possible. In variant E, two pushbuttons are installed that allow for controlled bleeding of the gripper.

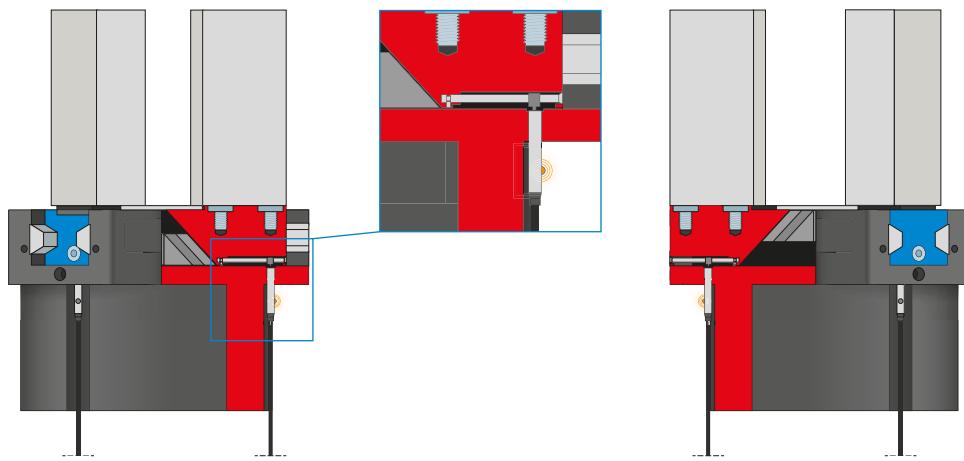

Quick exhaust valve – DEV

For rapid bleeding of the compressed air and preventing back pressure

The inline valves make a faster cycle time possible and prevent the formation of condensate in grippers with a small cylinder volume. To ensure the function, the valve must be installed as close to the gripper's air connection as possible.

SENSORS

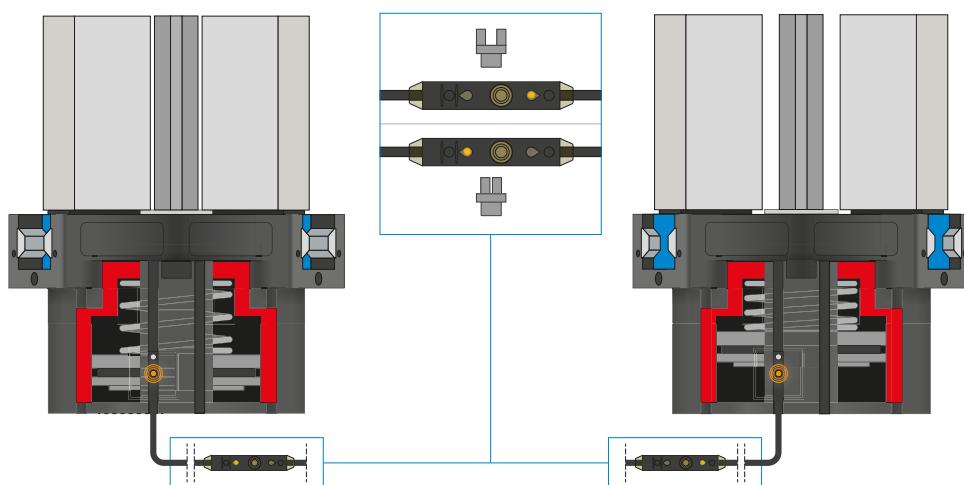

Inductive sensors – NJ*

For direct position sensing of the gripper jaws

The sensor is guided into the intake as far as it will go and fixed in place using the lateral clamping screw. Tuning to the desired position then takes place by adjusting the cam switch. The sensors are available in versions with 5 m cables with exposed leads and 0,3 m cable with connector, as well as with direct plug orientation.

*Not for variant AL-A

2-point magnetic field sensors – MFS

With two freely programmable switching points

Using the programming unit integrated in the cable, two switch points can be freely defined for this sensor. To do so, the sensor is clamped in the C-groove, the gripper approaches position one and the position is taught in using the teach button. Afterwards, the second position is approached with the gripper and programmed. To ensure use in a wide variety of space conditions, the sensors are available in two variants. While the horizontal MFS02, with straight cable outlet, disappears into the C-groove of the gripper almost completely, the vertical MFS01 is taller, but has a cable outlet that is offset at an angle of 90°. The sensors are available in versions with 5 m cables with exposed leads and 0,3 m cable with connector.

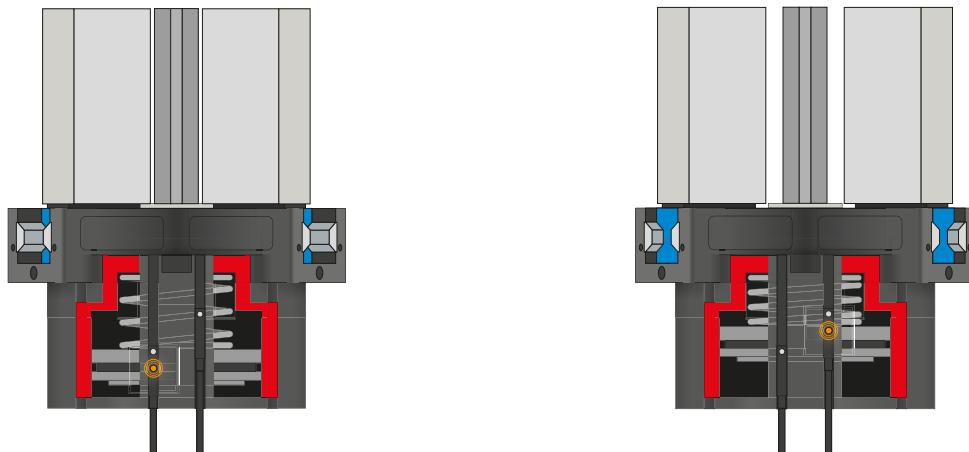

3-JAW CONCENTRIC GRIPPERS

SERIES GPD5000 FUNCTIONAL DESCRIPTION

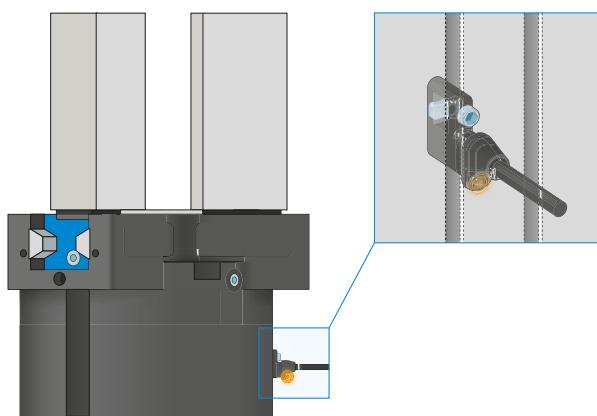

SENSORS

MFS02

4

MFS01

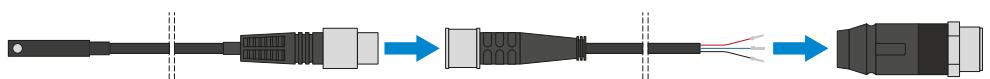

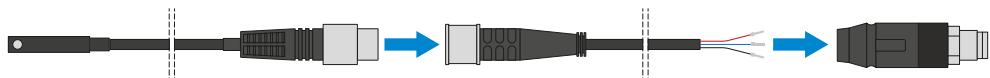

1-point magnetic field sensors – MFS

For non-contact sensing of the piston position

These sensors are installed in the C-groove of the gripper and detect the magnet attached to the piston of the gripper. To ensure use in a wide variety of space conditions, the sensors are available in two variants. While the horizontal MFS02, with straight cable outlet, disappears into the C-groove of the gripper almost completely, the vertical MFS01 is taller, but has a cable outlet that is offset at an angle of 90°. The variants are available in versions with 5 m cables with exposed leads and 0,3 m cable with connector.

CONNECTIONS / OTHER

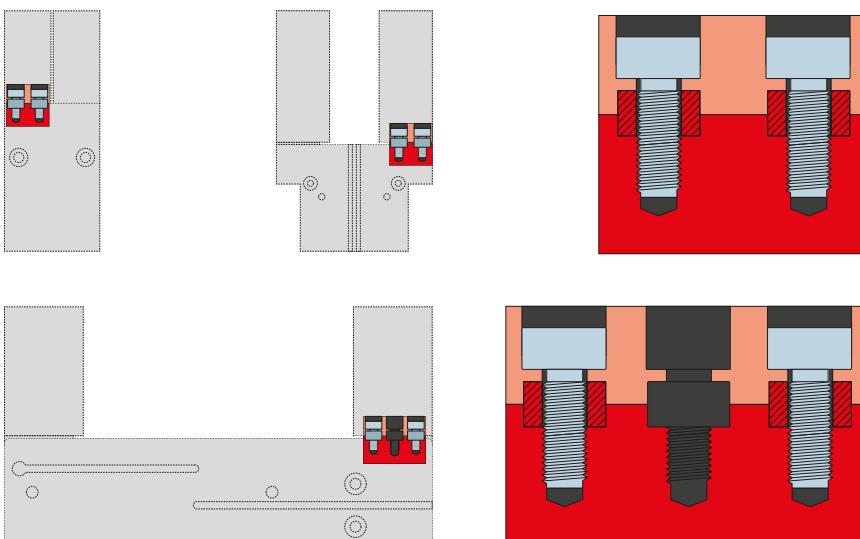

4

Plug-in connectors

For extending and fabricating the connection lines for the sensors

Cables with a length of 5 m with exposed leads are available. Depending on the specific needs, the cables can be shortened or fabricated with connectors in sizes M8 and M12.

Centering sleeves

For defined position measurement of the gripper fingers

The centering sleeves are inserted into the fits of the gripper jaws to define the position of the gripper fingers. The centering sleeves are comparable to a pin connection.

► **Gripping force diagram**

[N] Shows the arithmetic total of the individual forces that occur on the gripper fingers, depending on the gripper finger length

The graph plots the total gripping force in Newtons (N) against the gripper finger length in millimeters (mm). The Y-axis ranges from 0 to 20,000 N, and the X-axis ranges from 0 to 240 mm. Six data series are shown: N (red squares), NC / NO (blue triangles), S (white circles), SC / SO (orange diamonds), and two variants of S (black diamonds and black squares).

Finger Length [mm]	N [N]	NC / NO [N]	S [N]	SC / SO [N]	S (black) [N]	S (black) [N]

240	4500	2500	1500	1000	1800	800

► **Forces and moments**

Displays static forces and moments that can also have an effect, besides the gripping force.

The diagram illustrates a gripper with coordinate axes. A vertical double-headed arrow labeled F_a represents axial force. A horizontal double-headed arrow labeled M_x represents moment about the horizontal axis. A diagonal double-headed arrow labeled M_y represents moment about the vertical axis. A curved arrow labeled M_r represents moment about the rotational axis of the gripper.

► **Gripping force diagram**

Shows the arithmetic total of the individual forces that occur on the gripper fingers, depending on the gripper finger length [N]

The graph plots total gripping force in Newtons (N) against finger length in millimeters (mm). Five data series are shown: N (blue diamonds), S (orange triangles), SC / SO (blue squares), N (green inverted triangles), and NC / NO (purple squares). All series show a slight decrease in force as finger length increases from 0 to 250 mm.

Finger Length [mm]	N (blue diamond)	S (orange triangle)	SC / SO (blue square)	N (green inverted triangle)	NC / NO (purple square)
0	~5000	~30000	~45000	~15000	~20000
50	~5000	~25000	~40000	~15000	~18000
100	~5000	~22000	~38000	~14000	~16000
150	~5000	~20000	~36000	~13000	~14000
200	~5000	~18000	~34000	~12000	~12000
250	~5000	~16000	~32000	~11000	~10000

► **Forces and moments**

Displays static forces and moments that can also have an effect, besides the gripping force.

A 3D perspective view of the gripper showing various force vectors: M_x (horizontal moment about the center), M_y (vertical moment about the center), M_r (moment about the right side), and F_a (vertical force at the center).

► **Gripping force diagram**

Shows the arithmetic total of the individual forces that occur on the gripper fingers, depending on the gripper finger length [N]

The graph plots total gripping force (N) from 0 to 80,000 against finger length (mm) from 0 to 300. Four curves are shown: N (blue diamonds), S (orange triangles), SC / SO (purple squares), and NC / NO (green inverted triangles). All curves show a slight decrease as finger length increases.

Finger Length [mm]	N [N]	S [N]	SC / SO [N]	NC / NO [N]
0	10000	55000	70000	35000
50	10000	45000	65000	30000
100	10000	35000	60000	25000
150	10000	30000	55000	20000
200	10000	25000	50000	15000
250	10000	20000	45000	10000

► **Forces and moments**

Displays static forces and moments that can also have an effect, besides the gripping force.

A 3D perspective view of the gripper base with coordinate axes. A vertical double-headed arrow labeled F_a indicates axial force. A horizontal double-headed arrow labeled M_x indicates moment about the horizontal axis. A diagonal double-headed arrow labeled M_y indicates moment about the vertical axis. A curved arrow labeled M_r indicates moment about the rotational axis.

Force / Moment	Value
M_r [Nm]	390
M_x [Nm]	580
M_y [Nm]	600

3-JAW CONCENTRIC GRIPPERS

SERIES GPD5000IL

► PRODUCT ADVANTAGES

IO-Link

“The hybrid”

- ▶ Pneumatic drive combined with IO-Link technology
- ▶ Up to 50% reduction in cycle times and up to 90% less compressed air usage
- ▶ Connection over just one pneumatic line and IO-Link cable
- ▶ Integrated valve technology, sensor technology, status display, pressure monitoring and temperature monitoring
- ▶ Part detection down to +/- 0.05 mm for a tolerance range that can be taught for any value
- ▶ 32 workpieces data sets can be programmed
- ▶ Protected from corrosion and sealed in accordance with IP64
- ▶ Up to 30 million cycles without maintenance

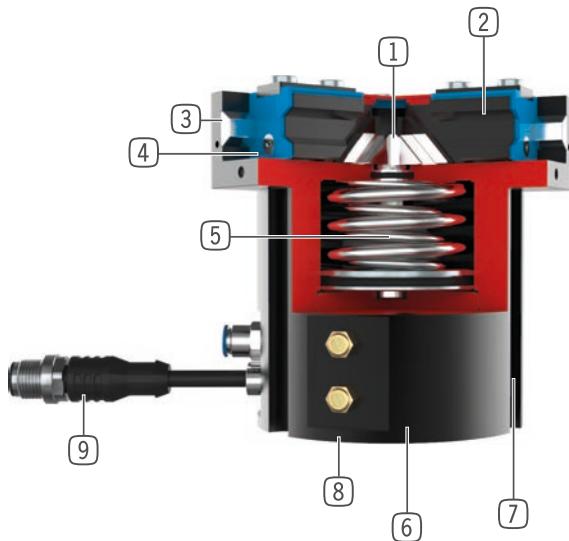

5

► BENEFITS IN DETAIL

① Wedge hook mechanism

- high forces and moments capacity
- Synchronized gripper jaw movement

② Gripper jaw

- Gripper fingers mounted using removable centering sleeves
- Lubricated for life via incorporated lubrication slots

③ Steel Linear Guide

- Steel in steel guide
- Enables use of extremely long gripper fingers

④ Dual lip seal

- IP64
- Prevents grease from being squeezed out, increasing service life

⑤ Integrated gripping force safety device

- Spring built into cylinder chamber as an energy store

⑥ Mounting and positioning

- Alternatively, on several sides for customized mounting

⑦ Position sensing

- integrated Hallsensor

⑧ Integrated valve technology

- Activation of the gripper by means of a compressed air supply

⑨ Integrated control module

- Single-cable solution via IO-Link
- Pressure, temperature, position and other parameters are readable

3-JAW CONCENTRIC GRIPPERS

SERIES GPD5000IL FUNCTIONAL DESCRIPTION

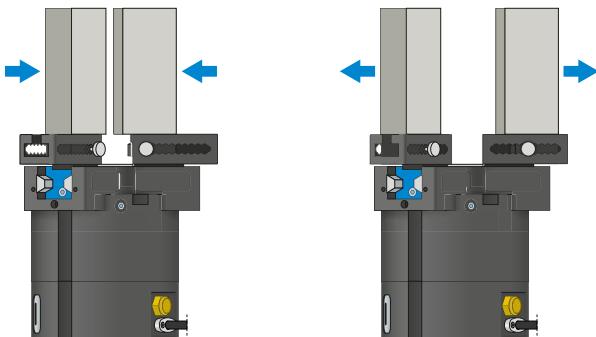

GRIPPING COMPONENTS

Universal jaws – UB5000

Can be used immediately or for individual reprocessing

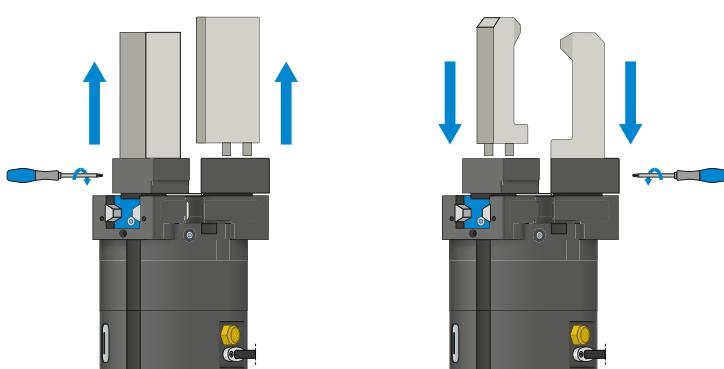

The gripper blanks are available in aluminum (AL) and steel (ST) versions and are installed directly on the gripper using the screws in the scope of delivery. The fits for the centering sleeves are already in place for this purpose. One universal jaw is required for each gripper jaw.

Adjustment jaws – EB5000

For tool-free adaptation of the gripper range

By manually activating the locking mechanism, which is pre-tensioned by a spring, the adjustment jaw can be moved within a grid of detent notches that has a number scale. Depending on the forces and torques that apply, the adjustment jaws are available in aluminum (AL) and steel (ST) versions. One adjustment jaw is required for each gripper jaw.

Interchangeable jaws – WB5000

Enable fast change of individual gripper fingers

For each gripper jaw, a fixed part and at least one loose part set is needed, depending on the number of gripper fingers to be changed. Manual locking via the Torx wrench included in the scope of delivery of the fixed part can take place from two sides.

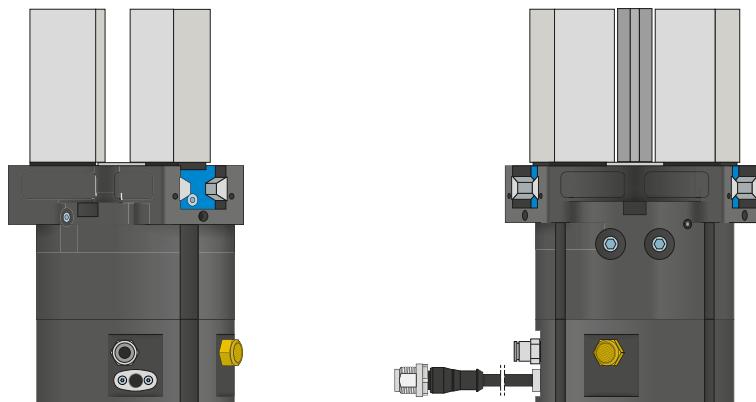

THE GRIPPING COMPONENTS CAN BE COMBINED!

The gripper components listed above can be combined with each other and are compatible with the various series of the 5000 gripper family.

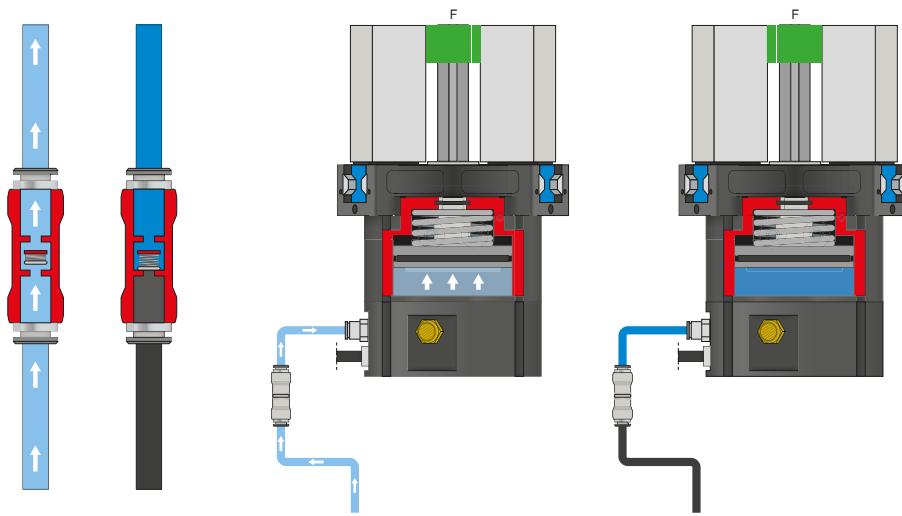

ENERGY SUPPLY

Pneumatic threaded connections

Available in straight and angled design. Can be chosen freely depending on the space conditions or installation situation.

Pressure safety valve – DSV

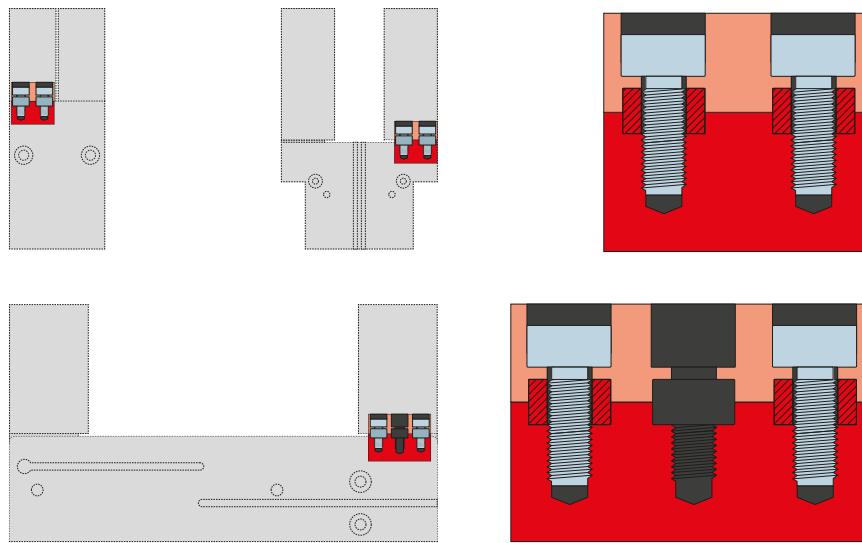

The throttle check valve integrated into the supply air line retains the system pressure in case of EMERGENCY STOP. To ensure the function, the valve must be installed as close to the gripper's air connection as possible. Control voltage and actuator voltage must be maintained for this purpose.

3-JAW CONCENTRIC GRIPPERS

SERIES GPD5000IL FUNCTIONAL DESCRIPTION

CONNECTIONS / OTHER

5 Centering sleeves

For defined position measurement of the gripper fingers

The centering sleeves are inserted into the fits of the gripper jaws to define the position of the gripper fingers. The centering sleeves are comparable to a pin connection.

reddot design award
winner 2018

"ALL in ONE"

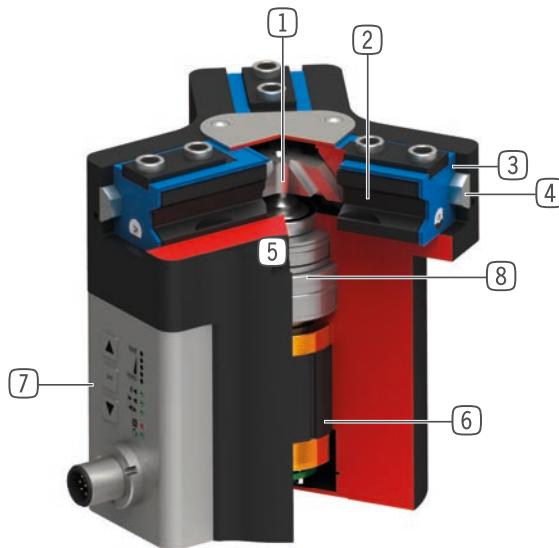

- ▶ Approximately the same gripping force as a comparable pneumatic gripper
- ▶ Self locking mechanism in case of power drop
- ▶ Same connection hole patterns as a comparable pneumatic gripper
- ▶ Plug and play – single-cable solution, supports incredibly easy control using I/O signals or IO-Link
- ▶ Integrated ACM control module - option of configuring gripping force, travel time and switching points
- ▶ Protected from corrosion and sealed in accordance with IP64
- ▶ Brushless DC motor – up to 30 million cycles without maintenance

► SERIES CHARACTERISTICS

Installation size	Variants

► BENEFITS IN DETAIL

- ① Wedge hook mechanism**
 - high forces and moments capacity
 - Synchronized gripper jaw movement
- ② Gripper jaw**
 - Gripper fingers mounted using removable centering sleeves
 - Lubricated for life via incorporated lubrication slots
- ③ Dual lip seal**
 - Enables IP64
 - Prevents grease from being squeezed out, increasing service life
- ④ Steel Linear Guide**
 - Steel in steel guide
 - Enables use of extremely long gripper fingers
- ⑤ Mounting and positioning**
 - Alternatively, on several sides for customized mounting
 - Pneumatic and electrical versions identical apart from height
- ⑥ BLDC motor**
 - wear-resistant brushless DC motor
- ⑦ Advanced control module**
 - Integrated control module with single-cable solution
 - Gripping force, travel time and query programmable via the control panel on the housing
- ⑧ Drive train**
 - Combination of trapezoidal spindle and gear
 - Durable and robust

3-JAW CONCENTRIC GRIPPERS

SERIES GED5000 FUNCTIONAL DESCRIPTION

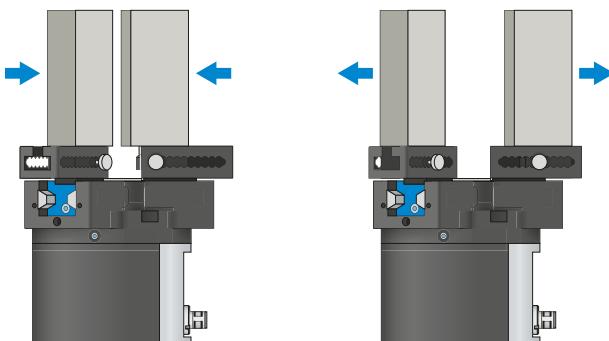

GRIPPING COMPONENTS

Universal jaws – UB5000

Can be used immediately or for individual reprocessing

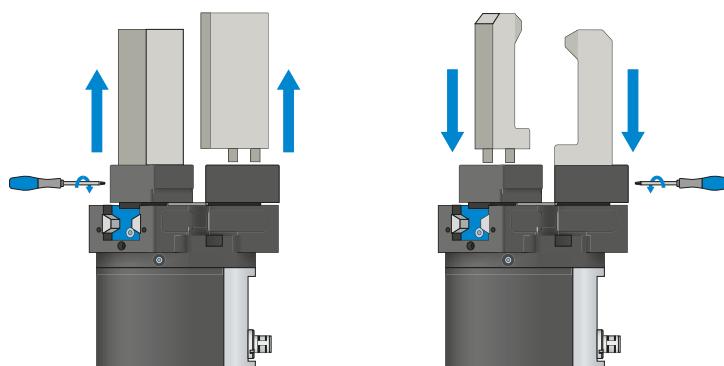

The gripper blanks are available in aluminum (AL) and steel (ST) versions and are installed directly on the gripper using the screws in the scope of delivery. The fits for the centering sleeves are already in place for this purpose. One universal jaw is required for each gripper jaw.

Adjustment jaws – EB5000

For tool-free adaptation of the gripper range

By manually activating the locking mechanism, which is pre-tensioned by a spring, the adjustment jaw can be moved within a grid of detent notches that has a number scale. Depending on the forces and torques that apply, the adjustment jaws are available in aluminum (AL) and steel (ST) versions. One adjustment jaw is required for each gripper jaw.

Interchangeable jaws – WB5000

Enable fast change of individual gripper fingers

For each gripper jaw, a fixed part and at least one loose part set is needed, depending on the number of gripper fingers to be changed. Manual locking via the Torx wrench included in the scope of delivery of the fixed part can take place from two sides.

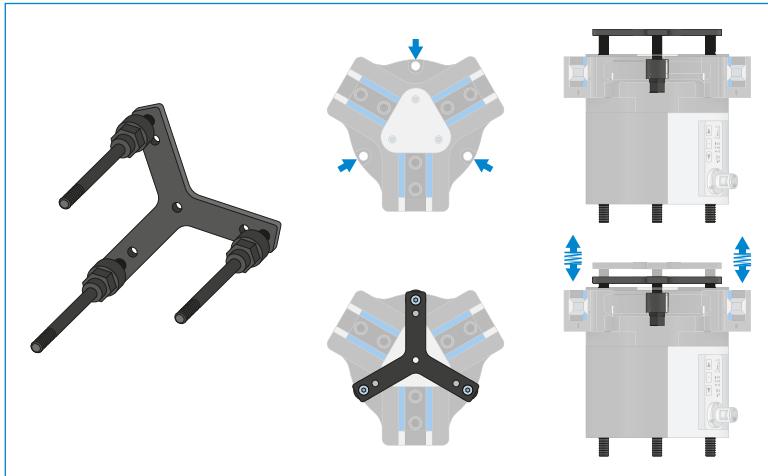

THE GRIPPING COMPONENTS CAN BE COMBINED!

The gripper components listed above can be combined with each other and are compatible with the various series of the 5000 gripper family.

GRIPPING COMPONENTS

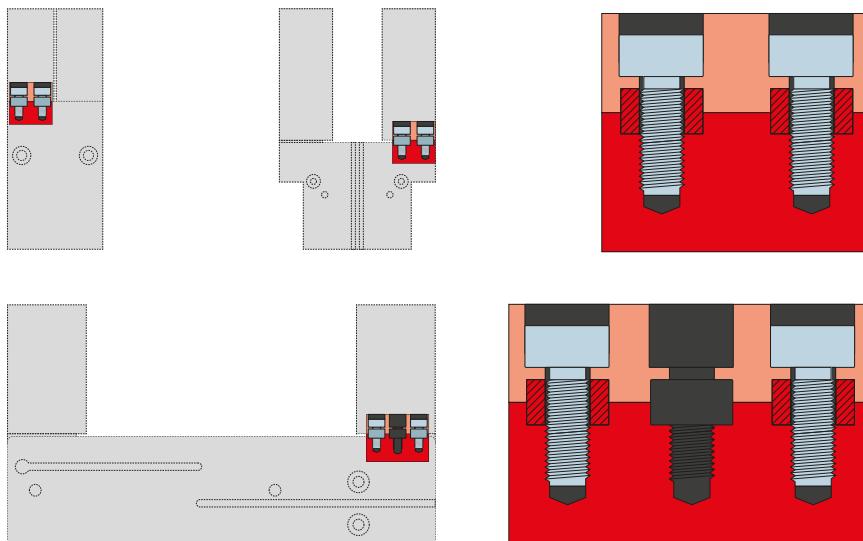

Pressure piece – ADS5000

When the gripper fingers are open, the pressure piece is used for spring-supported positioning of the workpiece against a limit stop. This greatly reduces the loads on the gripper that arise during joining.

CONNECTIONS / OTHER

Centering sleeves

For defined position measurement of the gripper fingers

The centering sleeves are inserted into the fits of the gripper jaws to define the position of the gripper fingers. The centering sleeves are comparable to a pin connection.

2-JAW ANGULAR GRIPPERS

SERIES GPW5000

► PRODUCT ADVANTAGES

“The Universal One”

► Highest performance with the smallest dimensions

Features a one-of-a-kind ratio of net mass to gripper finger length and gripping moment. The performance of your machine is increased as a result.

► Versatile applicability

Thanks to standard functionality such as IP64 and corrosion protection, you are able to use these grippers in almost any of your applications. Even the toughest environments are no problem.

► Robust and process-reliable

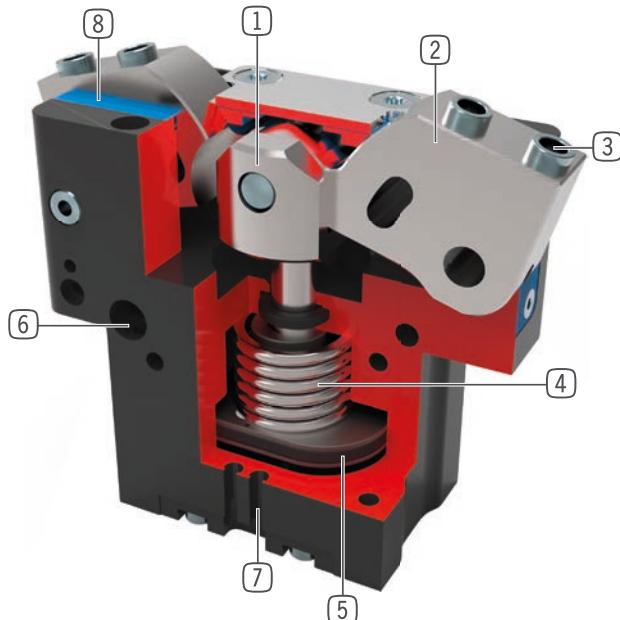

Thanks to a maintenance-free design up to 30 million cycles and the most solid force transmission possible, process assurance is maximized.

2-JAW ANGULAR GRIPPERS

SERIES GPW5000 FUNCTIONAL DESCRIPTION

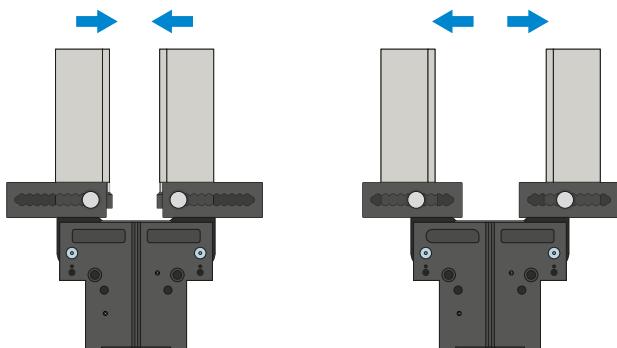

GRIPPING COMPONENTS

Universal jaws – UB5000

Can be used immediately or for individual reprocessing

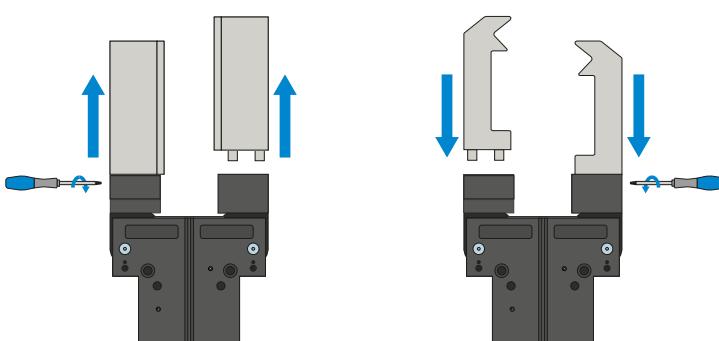

The gripper blanks are available in aluminum (AL) and steel (ST) versions and are installed directly on the gripper using the screws in the scope of delivery. The fits for the centering sleeves are already in place for this purpose. One universal jaw is required for each gripper jaw.

Adjustment jaws – EB5000

For tool-free adaptation of the gripper range

By manually activating the locking mechanism, which is pre-tensioned by a spring, the adjustment jaw can be moved within a grid of detent notches that has a number scale. Depending on the forces and torques that apply, the adjustment jaws are available in aluminum (AL) and steel (ST) versions. One adjustment jaw is required for each gripper jaw.

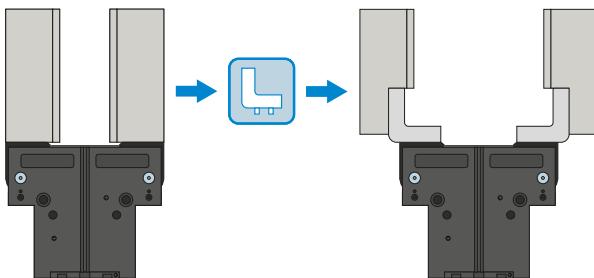

Interchangeable jaws – WB5000

Enable fast change of individual gripper fingers

For each gripper jaw, a fixed part and at least one loose part set is needed, depending on the number of gripper fingers to be changed. Manual locking via the Torx wrench included in the scope of delivery of the fixed part can take place from two sides.

GRIPPING COMPONENTS

L-gripper jaw – LB5000

Fast and easy method for adapting and installing the gripper fingers on the sides.

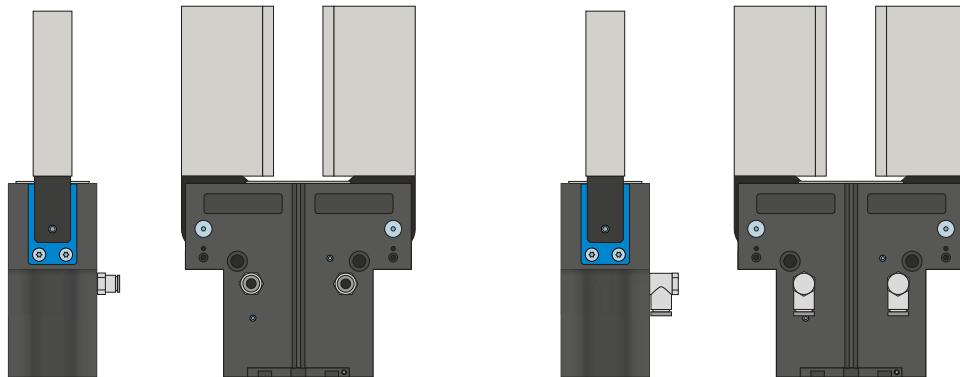

THE GRIPPING COMPONENTS CAN BE COMBINED!

The gripper components listed above can be combined with each other and are compatible with the various series of the 5000 gripper family.

ENERGY SUPPLY

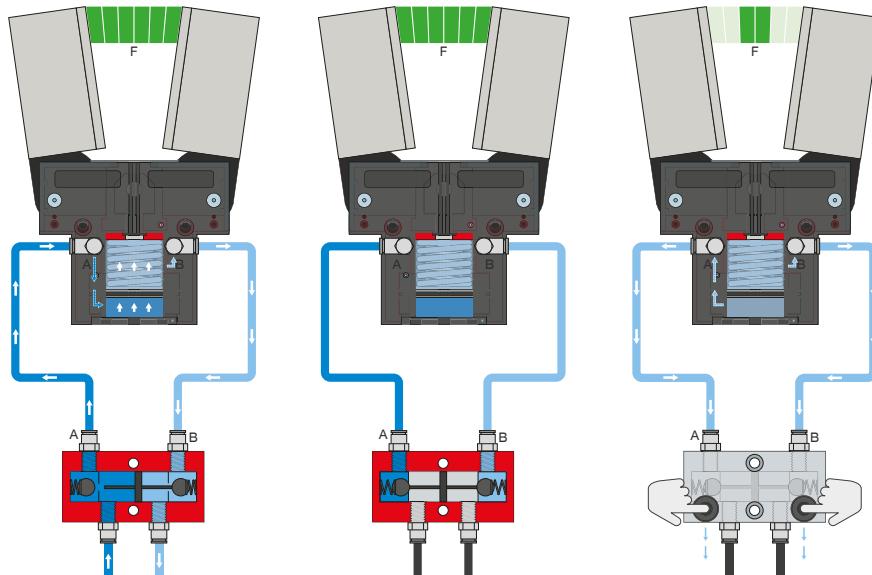

Pneumatic threaded connections

Available in straight and angled design. Can be chosen freely depending on the space conditions or installation situation.

2-JAW ANGULAR GRIPPERS SERIES GPW5000 FUNCTIONAL DESCRIPTION

ENERGY SUPPLY

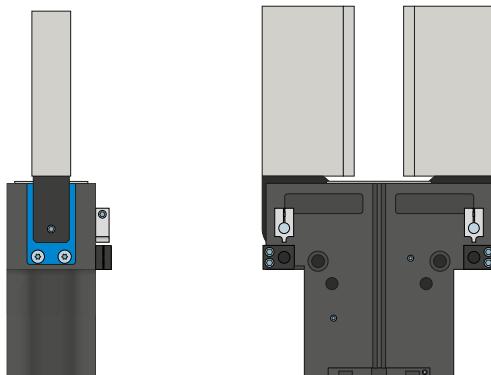

Pressure safety valve – DSV

Ensures safe retention of force and position if the system pressure drops

The integrated double check valve, which can be unlocked, retains the system pressure of the gripper in case of EMERGENCY STOP. To ensure the function, the valve must be installed as close to the gripper's air connection as possible. In variant E, two pushbuttons are installed that allow for controlled bleeding of the gripper.

SENSORS

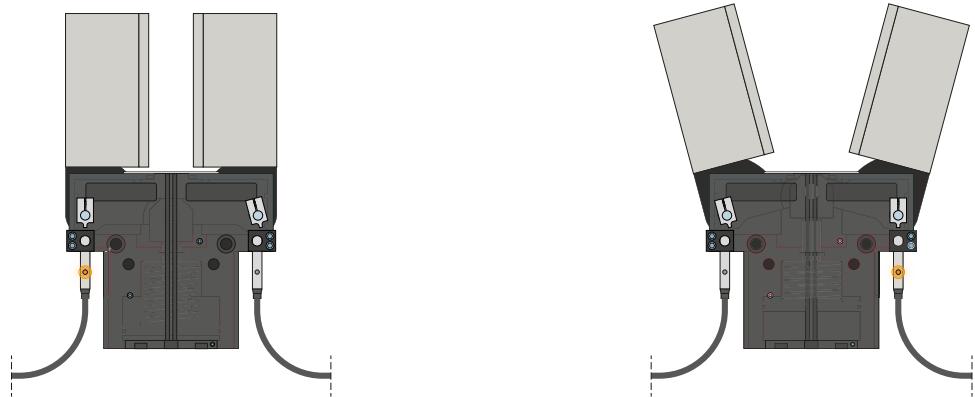

Attachment kit

The attachment kit is installed on the gripper using the fastening material included in the scope of delivery. The attachment kit enables sensing of the gripper positions via inductive proximity switches.

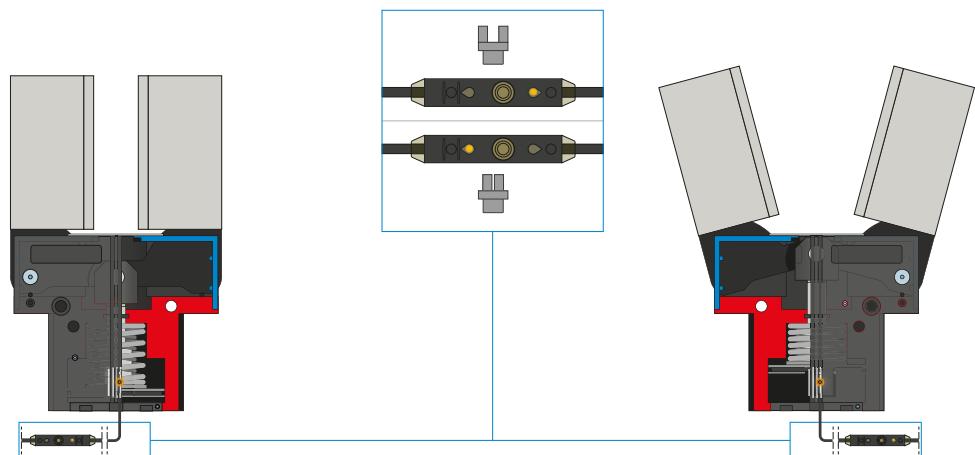

SENSORS

Inductive sensors – NJ

For direct position sensing of the gripper jaws

The sensor is guided into the intake as far as it will go and fixed in place using the lateral clamping screw. Tuning to the desired position then takes place by adjusting the cam switch. The sensors are available in versions with 5 m cables with exposed leads and 0,3 m cable with connector, as well as with direct plug orientation.

2-point magnetic field sensors – MFS

With two freely programmable switching points

Using the programming unit integrated in the cable, two switch points can be freely defined for this sensor. To do so, the sensor is clamped in the C-groove, the gripper approaches position one and the position is taught in using the teach button. Afterwards, the second position is approached with the gripper and programmed. To ensure use in a wide variety of space conditions, the sensors are available in two variants. While the horizontal MFS02, with straight cable outlet, disappears into the C-groove of the gripper almost completely, the vertical MFS01 is taller, but has a cable outlet that is offset at an angle of 90°. The sensors are available in versions with 5 m cables with exposed leads and 0,3 m cable with connector.

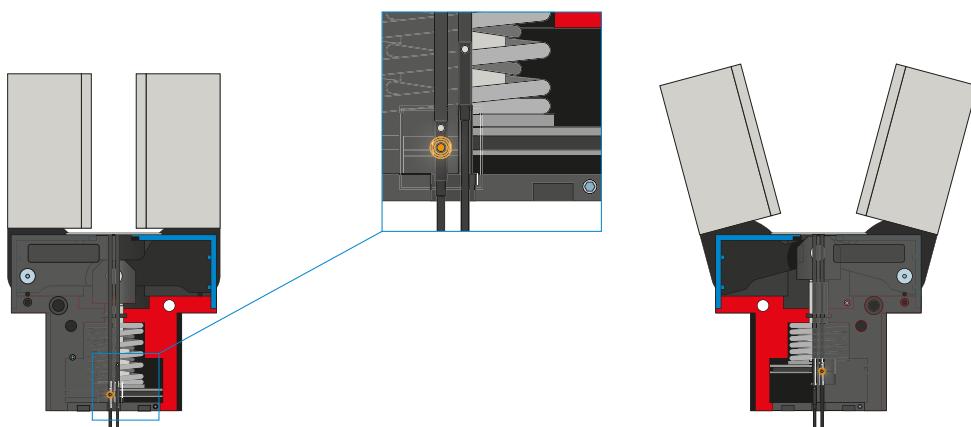

2-JAW ANGULAR GRIPPERS

SERIES GPW5000 FUNCTIONAL DESCRIPTION

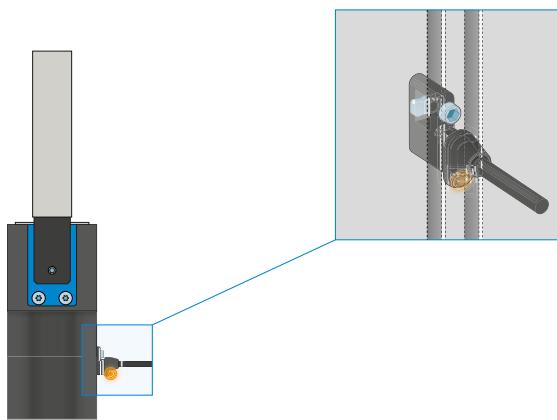

SENSORS

MFS02

MFS01

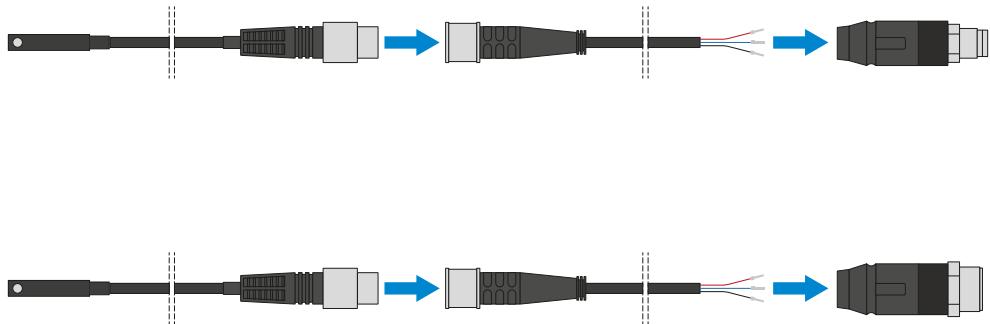

1-point magnetic field sensors – MFS

For non-contact sensing of the piston position

These sensors are installed in the C-groove of the gripper and detect the magnet attached to the piston of the gripper. To ensure use in a wide variety of space conditions, the sensors are available in two variants. While the horizontal MFS02, with straight cable outlet, disappears into the C-groove of the gripper almost completely, the vertical MFS01 is taller, but has a cable outlet that is offset at an angle of 90°. The variants are available in versions with 5 m cables with exposed leads and 0,3 m cable with connector.

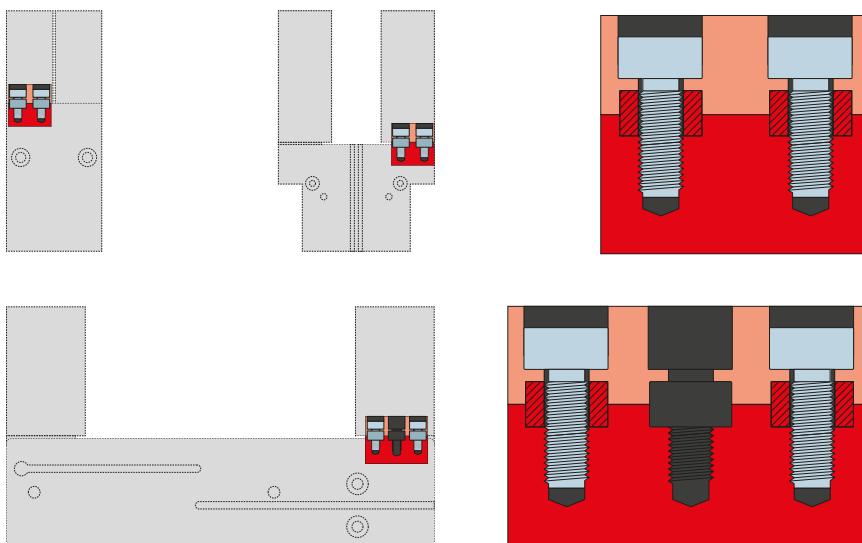

CONNECTIONS / OTHER

Plug-in connectors

For extending and fabricating the connection lines for the sensors

Cables with a length of 5 m with exposed leads are available. Depending on the specific needs, the cables can be shortened or fabricated with connectors in sizes M8 and M12.

Centering sleeves

For defined position measurement of the gripper fingers

The centering sleeves are inserted into the fits of the gripper jaws to define the position of the gripper fingers. The centering sleeves are comparable to a pin connection.

ADJUSTMENT JAWS

SERIES EB5000

► PRODUCT ADVANTAGES

► Easy and fast

Easy gripper finger adjustment to fit various workpieces saves time and money

► Reproducible and durable

The numbering of the detent notches allows you to easily configure the gripper finger length and FEM-calculated adjustment jaws guarantee maximum process reliability

► You can install one and the same adjustment jaw within the same 5000 gripper range on various gripper types of identical size and combine it with the respective accessory parts. This increases flexibility and reduces the diversity of parts in equal measure, which in turn reduces the storage costs

► THE BEST PRODUCT FOR YOUR APPLICATION

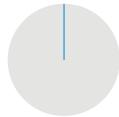

► Our products welcome the challenge!

Extreme conditions, all over the world—our tried and tested components and systems give you endless possibilities.

Find the best product for your specific use:

www.zimmer-group.com

► SETTING THE GRIPPER FINGER POSITION IN UNDER 10 SECONDS

Unlocking

Adjusting

Locking

* Pressure pieces are screwed on and can be removed to minimize interference contours

► FURTHER INFORMATION IS AVAILABLE ONLINE

ANGLE FLANGE SERIES WFR

Flexible connection to your robot

Adapter plate manufactured according to EN ISO 9409-1 matches for a variety of 40 different types of robot manufacturers. In addition, also available for robots with hollow axle.

1st step: Select adapter plate

Simply define the type of robot and you get the appropriate adapter plate.

About 100 different variants

Adapter plates and angle flanges can be combined with 16 different grippers - with the result of more than 100 different varieties. Choose from our main catalog your appropriate gripper. There you will find the most diverse designs: some with other without gripping force safety device, protected from dust or temperature resistant.

2nd step: Select Angle flange

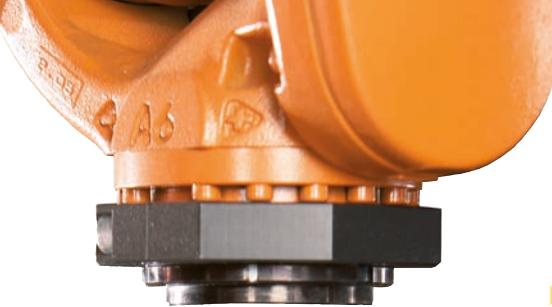

Choose a gripper and there follows the right angle flange.

Extend the functionality of your Angle flange

Cover plate, discharge nozzle or programming pins, with the extensive accessory, you can quickly and individually integrate additional functions.

3rd step: Select accessories

IO-LINK MEETS DIGITAL I/O

SMART COMMUNICATION MODULE

IO-Link meets digital I/O

The Smart Communication Module (SCM) is a master gateway that is suitable for all IO-Link components. With its two channels, the SCM can control two devices and on a functional level, offers the direct implementation of IO-Link to

digital I/O. The module thus makes it possible to integrate IO-Link devices into a digital infrastructure and utilize almost the full extended range of functions of the IO-Link device.

► PRODUCT ADVANTAGES

- ▶ Translates IO-Link to digital inputs and outputs (digital I/O) and from digital I/O to IO-Link
- ▶ Easy control of intelligent IO-Link grippers via 24 V digital I/O
- ▶ Configuration and training take place using the corresponding intuitive guideZ software
- ▶ Can be used with one or two grippers depending on the flexibility required
- ▶ Up to 15 different workpieces can be trained for one gripper

► BENEFITS IN DETAIL

- 1 Status**
 - Status display of SCM and IO-Link device
- 2 Ethernet RJ45**
 - Temporary connection for gripper configuration
- 3 Digital input**
 - Digital inputs for controlling the gripper actuators
- 4 IO-Link / Device 1**
 - Gripper module 1 connection
- 5 Digital output**
 - Digital outputs for monitoring the gripper sensors
- 6 IO-Link / Device 2**
 - Gripper module 2 connection
- 7 Power supply**
 - Voltage supply SCM and gripper

TOPOLOGY CONNECTION

Configuration and operation

Up to two Zimmer IO-Link devices can be connected to one Smart Communication Module. The digital inputs and outputs are wired directly to the robot controller or PLC. Simple digital control enables bidirectional communication. To configure the gripper parameters, a temporary network connection is established to a commercially available PC.

As soon as the parameters have been configured intuitively, this connection is no longer necessary. Next, the handling unit is automatically controlled directly via robot controller or PLC.

1 Connection

- ▶ IO-Link gripper
- ▶ Digital I/Os on the robot control system/PLC
- ▶ Power supply

2 Configuration

Temporary network connection via PC for use of the guideZ, expertZ and monitorZ software

► FURTHER INFORMATION IS AVAILABLE ONLINE

USAGE NOTE

GENERAL

The contents of this catalog are not legally binding and are intended solely for informational purposes. Any final agreement will be in the form of a written order confirmation from Zimmer GmbH, which occurs only subject to the respective current General Terms and Conditions of Sale and Delivery of Zimmer GmbH. These can be found online at www.zimmer-group.com.

All of the products listed in this catalog are designed for their intended use, e.g. machines for automation. The recognized technical regulations for safety and professional work must be followed for use and installation.

Furthermore, the respective laws, guidelines from TÜV, guidelines from the respective trade association and VDE stipulations shall apply.

The technical data listed in this catalog must be observed by the user. The conditions of use may not fall below or exceed the specified data. If information is missing, it cannot be assumed that there are no upper or lower limits or no limitations for specific use cases. Consultation is required in these cases.

Disposal is not included in the price, which would have to be taken into account accordingly in the event of return to or disposal by Zimmer GmbH.

TECHNICAL DATA AND FIGURES

The technical data and figures have been compiled with great care and to the best of our knowledge. We cannot guarantee that the information is up to date, correct or complete.

The specifications and information—such as figures, drawings, descriptions, dimensions, weights, materials, technical and other performance data and the described products and services—contained in general product descriptions, Zimmer GmbH catalogs, brochures and price lists in any form are subject to change and may be modified or updated at any time without prior notification. They are binding only to the extent expressly specified in a contract or order confirmation. Slight deviations from such descriptive product information shall be considered approved and shall not affect fulfillment of agreements insofar as they are reasonable for the customer.

LIABILITY

Products from Zimmer Group are subject to the German Product Liability Act. This catalog does not contain any guarantees, assurances of quality or procurement agreements for the products it depicts, neither expressly nor implied, including for the availability of products. Advertising statements relating to quality features, properties or applications for the products are not legally binding.

To the extent permitted by law, Zimmer GmbH is exempt from any liability for direct or indirect damage, subsequent damage and requests of any kind or on any legal basis resulting from the use of information contained in this catalogue.

TRADEMARK, COPYRIGHT AND REPRODUCTION

The depiction of commercial property rights in this catalog—such as brands, logos, registered trademarks or patents—does not include the granting of licenses or use rights. Their use is not permitted without the expressed written agreement of Zimmer GmbH. All contents of this catalog are the intellectual property of Zimmer GmbH. For the purposes of copyright, any unlawful use of intellectual property, including excerpts, is prohibited. Reprinting, copying or translating (including in the form of excerpts) are permitted only with the prior written consent of Zimmer GmbH.

STANDARDS

Zimmer Group has a quality management system certified in accordance with ISO 9001:2008. Zimmer Group has an environmental management system certified in accordance with ISO 14001:2004.

USAGE NOTE

INDIVIDUAL

DECLARATION OF INCORPORATION IN TERMS OF THE EC DIRECTIVE 2006/42/EC ON MACHINERY (ANNEX II 1 B)

We hereby declare that our elements meet the following basic requirements of the Machinery Directive 2006/42/EC as an incomplete machine

No.1.1.2., No.1.1.3., No.1.1.5., No.1.3.2, No. 1.3.4, No. 1.3.7, No.1.5.3, No.1.5.4, No.1.5.8., No.1.6.4, No.1.7.1, No.1.7.3, No.1.7.4.

We also declare that the specific technical documents were produced in accordance with Annex VII Part B of this Directive. We undertake to provide the market supervisory bodies with electronic versions of the incomplete machine's special documents via our documentation department should they have reason to request them.

The incomplete machine may only be commissioned if the machine or system in which the incomplete machine is to be installed has been determined to satisfy the conditions of the Machinery Directive 2006/42/EC and the EC Declaration of Conformity has been produced in accordance with Annex II A.
