

AIR DAMPERS

SERIES BAJO

▶ PRODUCT SPECIFICATIONS

Damper with a long service life that can be integrated with great versatility. Air friction technology for use in clean rooms without any problems.

▶ APPLICATION AREAS

Door

Sliding door

Drawer

Hinge

INDIVIDUAL DAMPERS

AIR FRICTION DAMPERS

PRINCIPLE OF FUNCTION

- ▶ In a sealed housing there is a piston which is moving back- and forward. By means of the pressure-difference which results within the closing-movement the sealing-lip will be pressed against the breaking-collar. This breaking-collar expand and presses the cylinder in which it moves. Thus the friction-energy is generated.
- ▶ No oil-leakage possible
- ▶ Friction force is related to the pressure

DAMPER WITH AND WITHOUT RESET-FUNCTION

Damper **without** reset-function needs a coupler onto the pistonrod is needed to be used within the fitting. The pistonrod do not extract by itself, it has to be extracted manually.

Damper **with** an integrated reset-function a Coupler is not needed onto the pistonrod within the fitting. The pistonrod will be extracted automatically.
