

CLAMPING ELEMENTS | HYDRAULIC

KWH6501SS1

▶ PRODUCT ADVANTAGES

▶ broad range of products

For all common profile rail guides

▶ Energize to close (NO)

Closing with pressure

▶ extremely durable

10 million static clamping cycles

▶ TECHNICAL DETAILS

① Profile rail guide

- Available for all common profile rail guides

② Return spring

- Interlocked integration in the jaws

③ Clamping jaw

- Pressed at the free surfaces of the profile rail guide

④ Housing

⑤ Membran

- For pressurization

⑥ Scraper

- Can also be ordered as an option

▶ INFORMATION ON THE PRODUCTS

APPLICATION SCENARIOS

▶ Machine table clamping of heavy cutting work centres

▶ Clamping of heavy handling systems

FURTHER INFORMATION

▶ Spacer plate

In addition, a spacer plate might have to be ordered as height compensation, depending on the height of the rail carriage (dimension D).

▶ Special variants on request, e.g.

With additional hydraulic connection (from above, from the front)

Track manufacturer	Rail type	Rail size	Carriage type
THK	HDR	65	HDR..LC

► TECHNICAL DRAWINGS

► TECHNICAL DATA

Order No.	KWH6501SS1
Operation	hydraulic
Holding force	22700 [N]
PLUS connection possible	No
Operating pressure	5 ... 160 [bar]
Nominal operating pressure	150.0 [bar]
B10d value	10,000,000
Positioning accuracy +/-	0,02 [mm]
Opening time	0.2 [s]
Closing time	0.15 [s]
Operating temperature	-10 ... +70 [°C]
Weight	16 [kg]
Function	Clamping
Condition	NO (Normally Open) open without pressure
Installation direction	from the front
Masking tape can be used	with masking tape
Displacement	4 [cm ³]

Schematic drawing. General tolerances in accordance with DIN ISO 2768 T1-f/T2-H. Edges in accordance with ISO 13715. Stop face can be used on both sides. Center fixing holes must be used. Element offers no guiding properties. Guidance must be external. The holding force is the maximum force that can be applied in the axial direction. Each clamping and braking element is tested in a 100% inspection before delivery for the specified holding forces on a hardened steel rail with a lightly oiled lubricating layer (ISO-VG 68). The use of other lubricants or rail coatings can influence the coefficient of friction. The operating instructions must be observed before commissioning. We reserve the right to make technical changes in the course of further development. The latest and further data can be found online and in the operating instructions at www.zimmer-group.com.
